R&D: Role Flow

How the R&D seat works in the Faculty Management System, with illustrated screens.

1. What R&D is

R&D is the college's research record keeper. Faculty and staff enter their own research outputs (publications, researcher IDs, citations, projects, patents, Ph.D. supervision, services, hackathons and innovations). R&D checks each submission and approves it or sends it back. Only verified records count.

R&D is a **seat**, not a separate kind of login. A faculty member holds it, signs in as usual and then picks **R&D** in the **Working as** switcher. The Principal appoints the seat from Role Assignments.

> All screens in this document are illustrations drawn from the page layouts, with placeholder names, titles and numbers. They contain no real college data.

2. End-to-end flow

Staff submit from their profile → **Pending Verification** dashboard tile + tab → **R&D opens the record** View → **Approve** becomes verified **or** **Reject + reason** staff corrects, resubmits

1. **Dashboard** shows how many records are waiting in each module, so the reviewer knows where to start.
2. Open a module and its **Pending Verification** tab. Every module works the same way.
3. **View** a record to read it in full, then **Approve**, or **Reject** with a required reason. A rejection notifies the staff member, who can correct and resubmit.
4. Approved and rejected records move to the **Verified** tab.
5. **Publications** also works as the college's official record: R&D can add a publication for any staff member, import many from a file, and edit or delete official records.

3. The eleven modules

Module	What staff submit
Publications	Research publications (also R&D's official record, with add and import)
Research Profiles	ORCID, Scopus Author ID, Researcher ID, Google Scholar ID, IRINS profile
Citation Metrics	Total citations and H-Index, with and without self-citations
Consultancy Projects	Consultancy work: client, category, amount
Seed Funding	Seed funding projects and outcomes
Sponsored Projects	Sponsored research projects: agency, application number, status

Discovery & Innovation	IPR records such as patents and copyrights
Ph.D. Supervision	Scholars supervised, guide status, degree awarded
Research Services	Conference, workshop, reviewer and editor contributions
Hackathons	Hackathons and competitions organised
Innovations	Innovations by faculty or students

Access to individual modules can be switched off by the college's administration, in which case that module disappears from the sidebar and the dashboard. The personal pages (My Profile, My Leave, Adjustment Requests) are the same as for every faculty-type role and are covered in the other role documents.

4. Screen by screen

Dashboard

`/r-and-d`

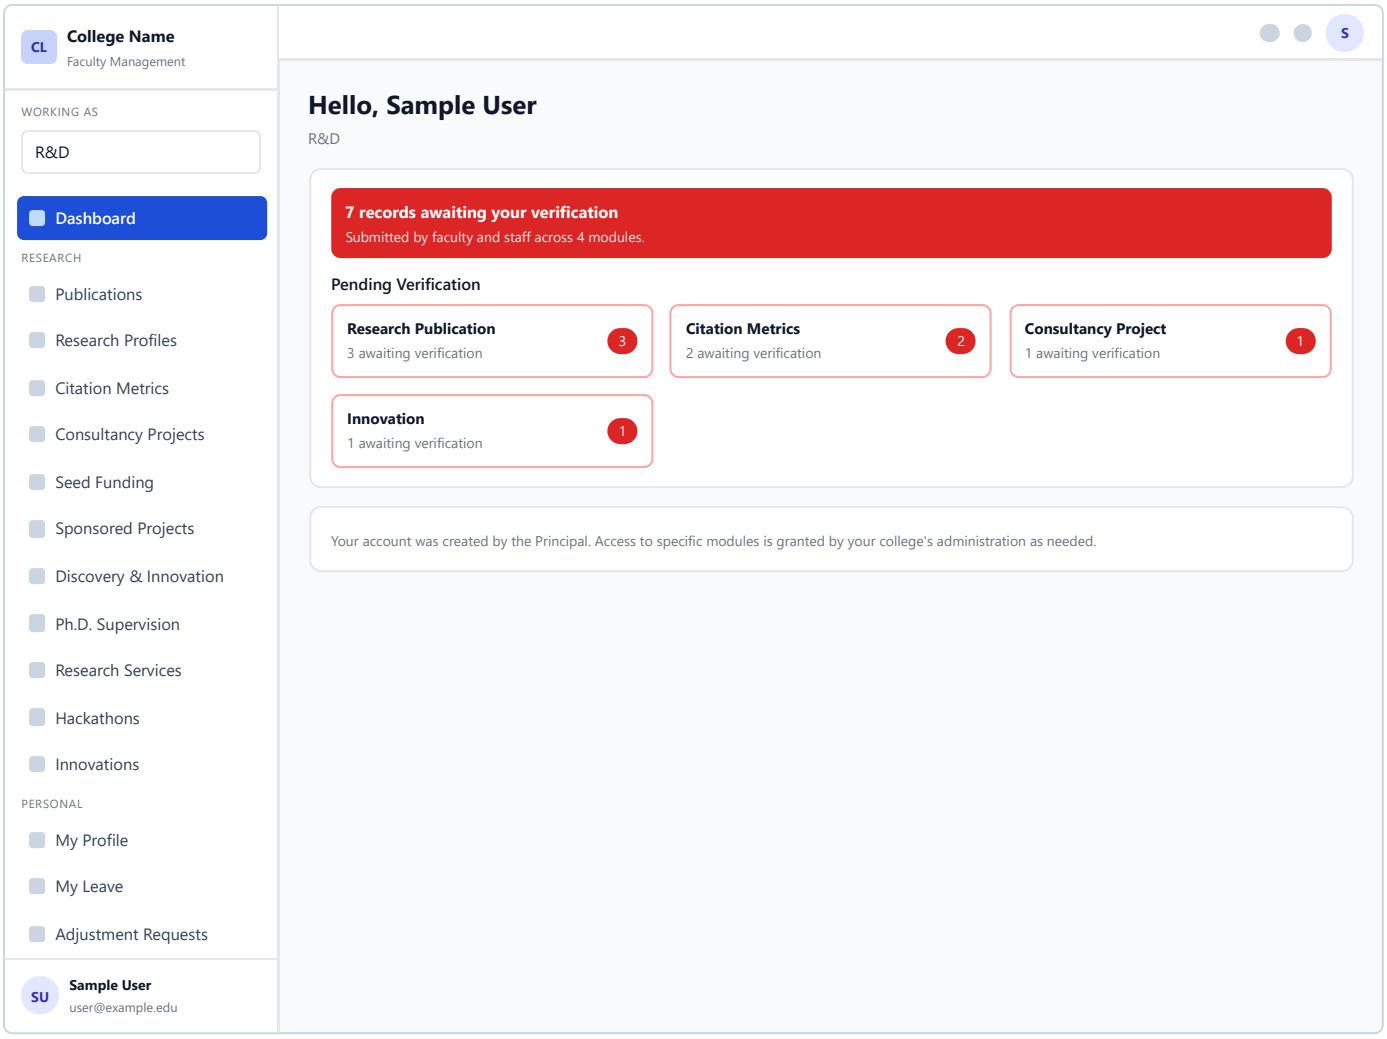

Figure 1. Dashboard (illustration with placeholder data)

The home page is a to-do list. A red banner counts every submission waiting for verification, and a tile for each module shows how many are waiting there, most first. A module with nothing waiting is left out, so only work that needs attention is shown.

What the user does here

1. Read the red banner to see how many records are waiting in total.
2. Press a module tile to open that module's Pending Verification list.
3. If every module is clear, the page says **Nothing awaiting verification**.

> R&D is a seat held by a faculty member. After signing in, choose R&D in the **Working as** switcher. The Principal appoints the seat from Role Assignments. A module that fails to load is still shown, marked as couldn't load, so it is never mistaken for being up to date.

Publications

`/r-and-d/publications`

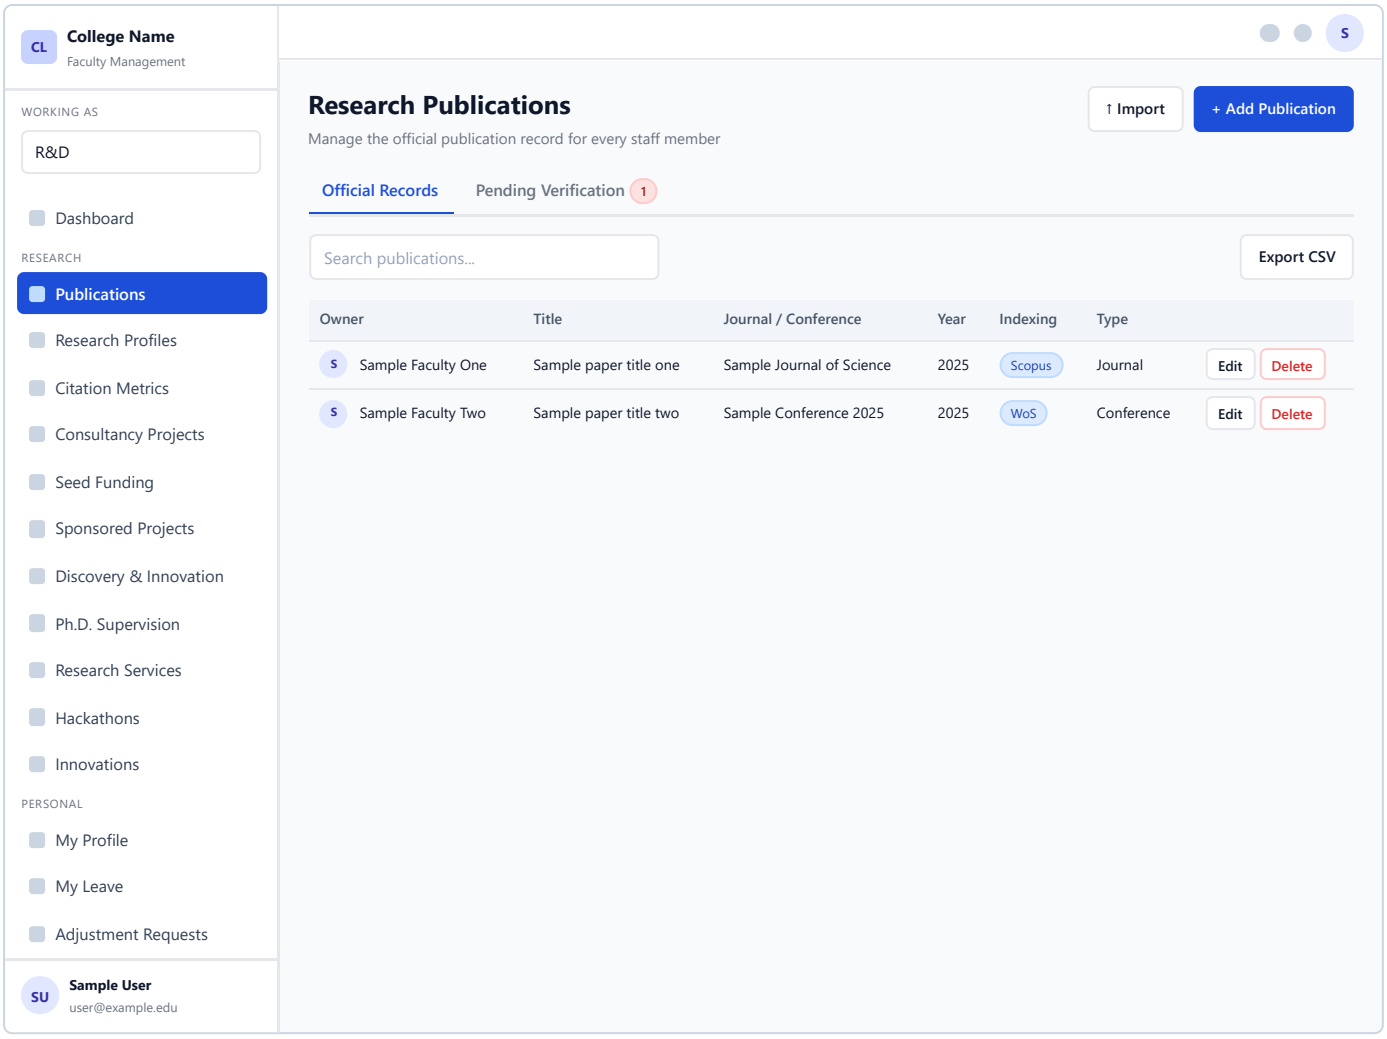

Figure 2. Publications (illustration with placeholder data)

Unlike the other modules, Publications is also where R&D keeps the college's official record. The first tab, Official Records, lists every publication with its owner, title, journal or conference, year, indexing and type. The second tab holds publications that staff submitted themselves and are waiting for verification.

What the user does here

1. Press **Add Publication** to record one on behalf of a staff member, or **Import** to load many at once.
2. On **Official Records**, press a row to open it, **Edit** to change it or **Delete** to remove it.
3. On **Pending Verification**, approve or reject staff submissions as described for the other modules.

Add Publication

`/r-and-d/publications/new`

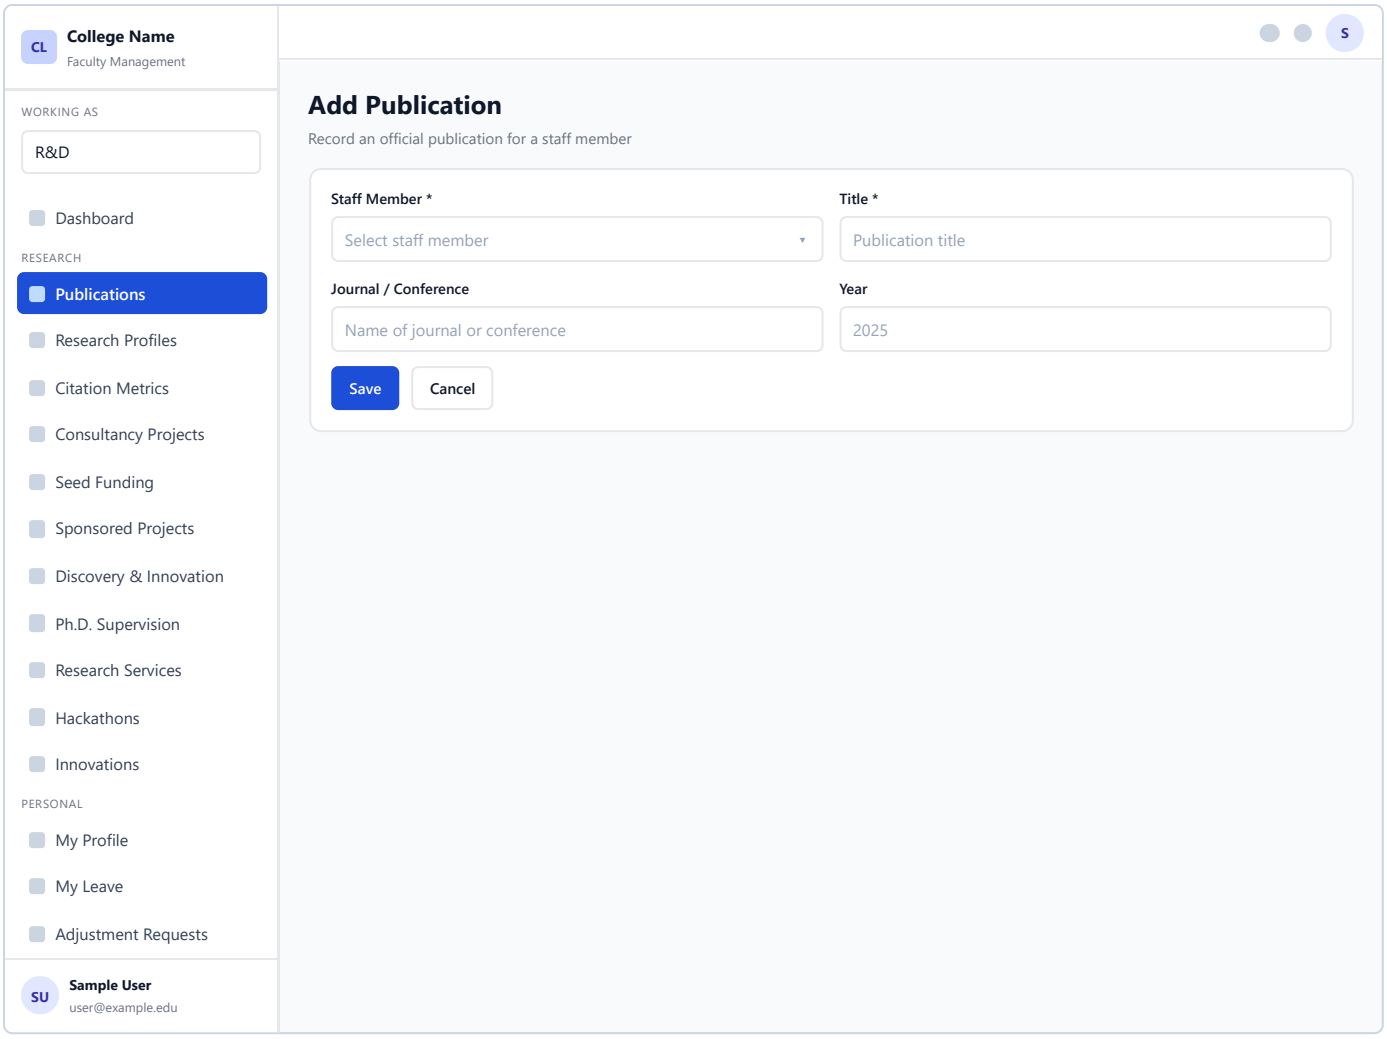

Figure 3. Add Publication (illustration with placeholder data)

A form for entering one publication on behalf of a staff member. The staff member is chosen first, and the record is saved as part of that person's profile.

What the user does here

1. Choose the **Staff Member** (required).
2. Fill in the publication details and press save.
3. The record appears under Official Records.

> The fields shown are the main ones. The live form has more publication details (indexing, type and so on).

Import Publications

`/r-and-d/publications/import`

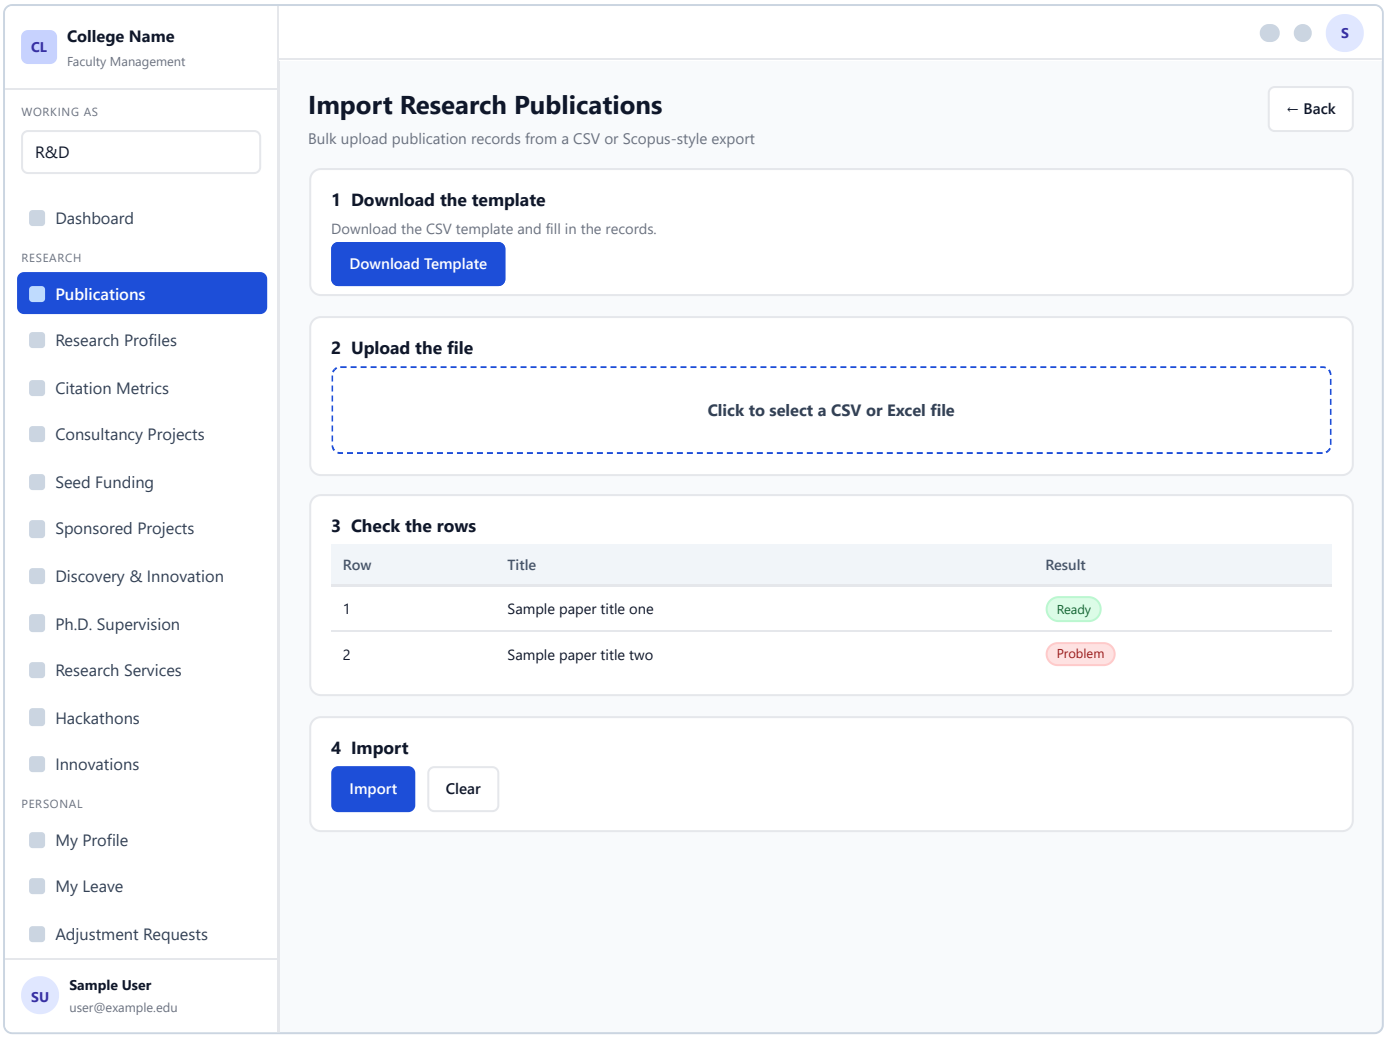

Figure 4. Import Publications (illustration with placeholder data)

Loads many publications from a file in four steps: download the template, upload the filled file, check the rows, then import.

What the user does here

1. **Download Template** and fill in one publication per row, or use a Scopus-style export.
2. Upload the file. The page lists every row and flags the ones with problems.
3. Fix flagged rows in the file and upload again if needed.
4. Press **Import**. **Clear** discards the upload.

> The step titles and buttons here follow the live page. The exact row columns in the check step are summarised.

Research Profiles

`/r-and-d/research-profiles`

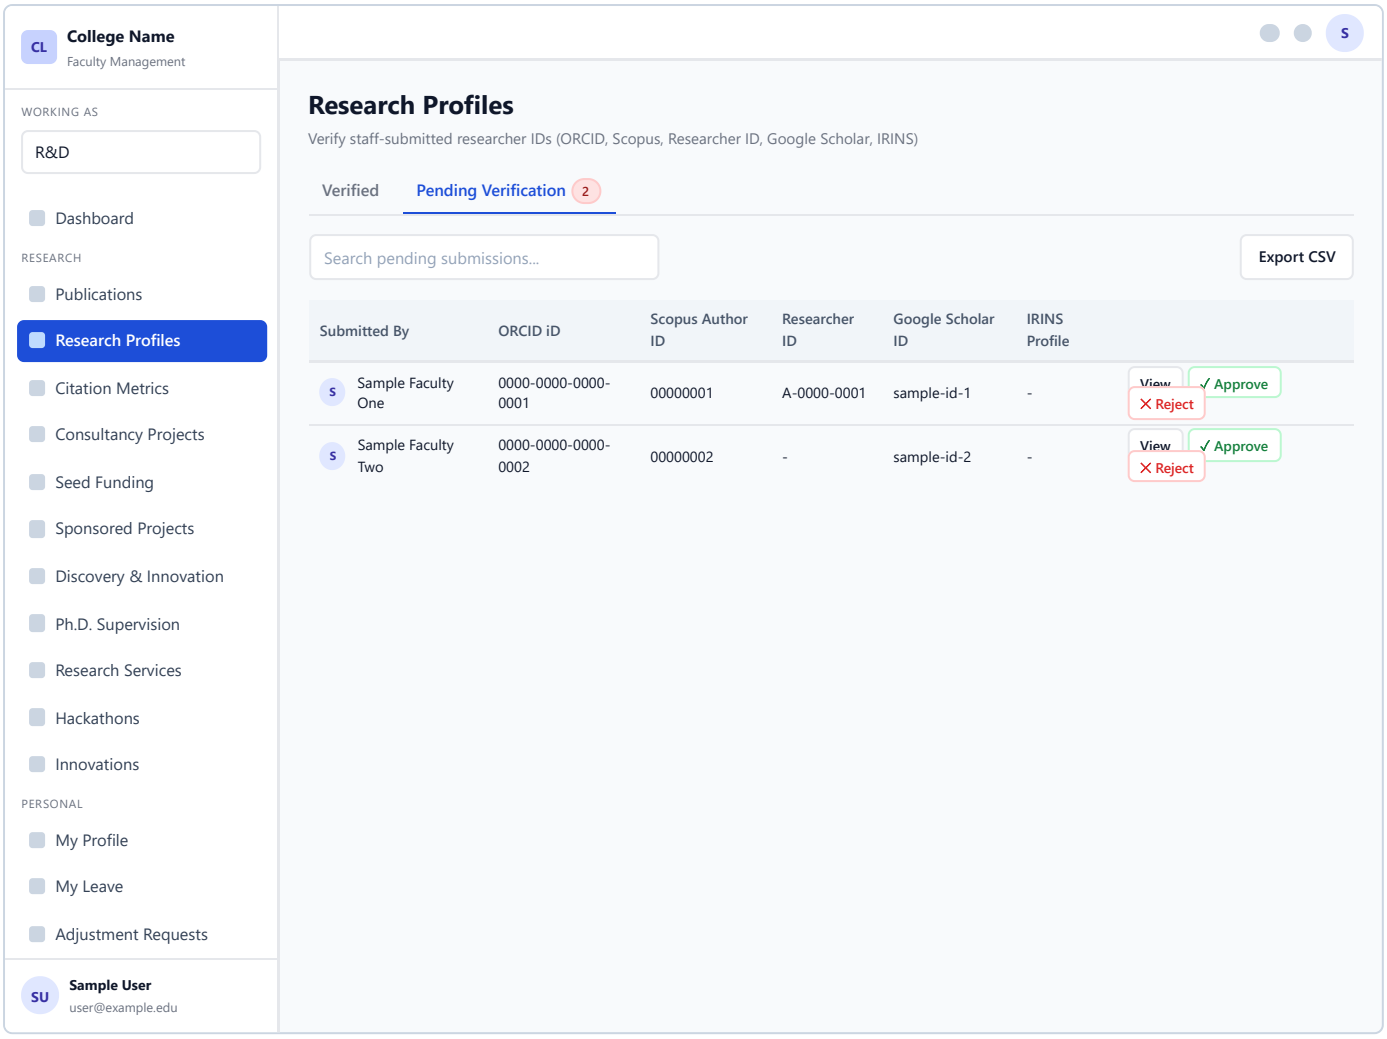

Figure 5. Research Profiles (illustration with placeholder data)

Staff enter their own researcher IDs (ORCID, Scopus Author ID, Researcher ID, Google Scholar ID, IRINS profile). R&D checks each submission before it counts.

What the user does here

1. Open the **Pending Verification** tab to see submissions that staff have made and nobody has checked yet.
2. Press **View** to read the full submitted record (see Figure 15).
3. Press **Approve** to verify it, or **Reject** and type the reason. The reason is required, and the staff member is notified and can correct and resubmit.
4. Switch to the **Verified** tab to see everything already approved or rejected.

> The pending list's columns are the five ID types.

Citation Metrics

`/r-and-d/citation-metrics`

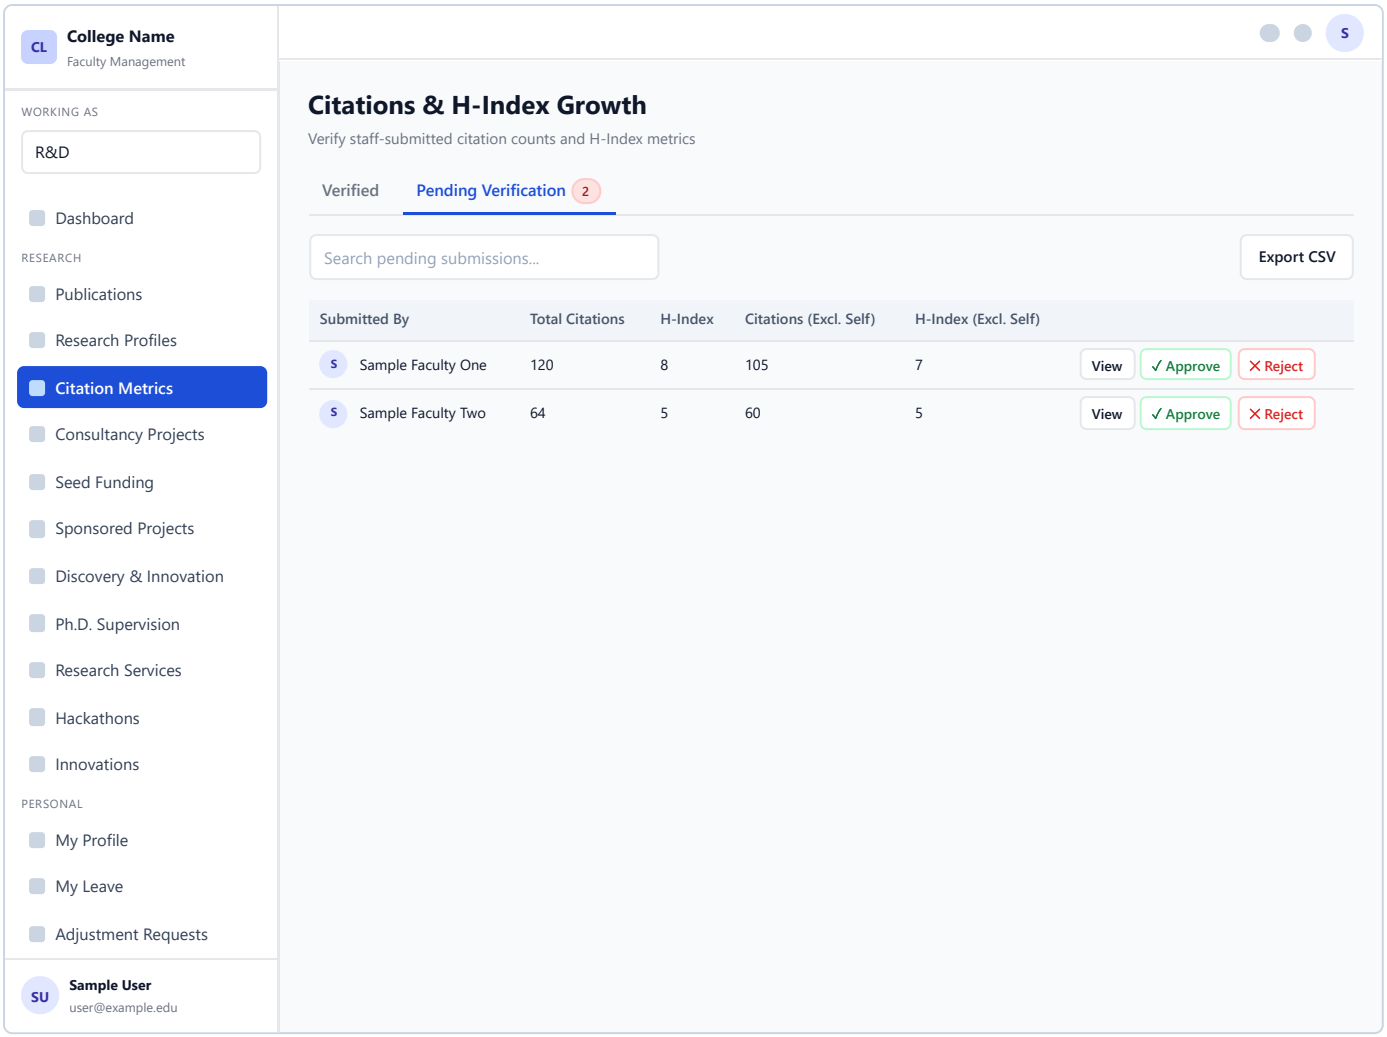

Figure 6. Citation Metrics (illustration with placeholder data)

Verifies the citation counts and H-Index values staff submit, both including and excluding self-citations.

What the user does here

1. Open the **Pending Verification** tab to see submissions that staff have made and nobody has checked yet.
2. Press **View** to read the full submitted record (see Figure 15).
3. Press **Approve** to verify it, or **Reject** and type the reason. The reason is required, and the staff member is notified and can correct and resubmit.
4. Switch to the **Verified** tab to see everything already approved or rejected.

Consultancy Projects

`/r-and-d/consultancy-projects`

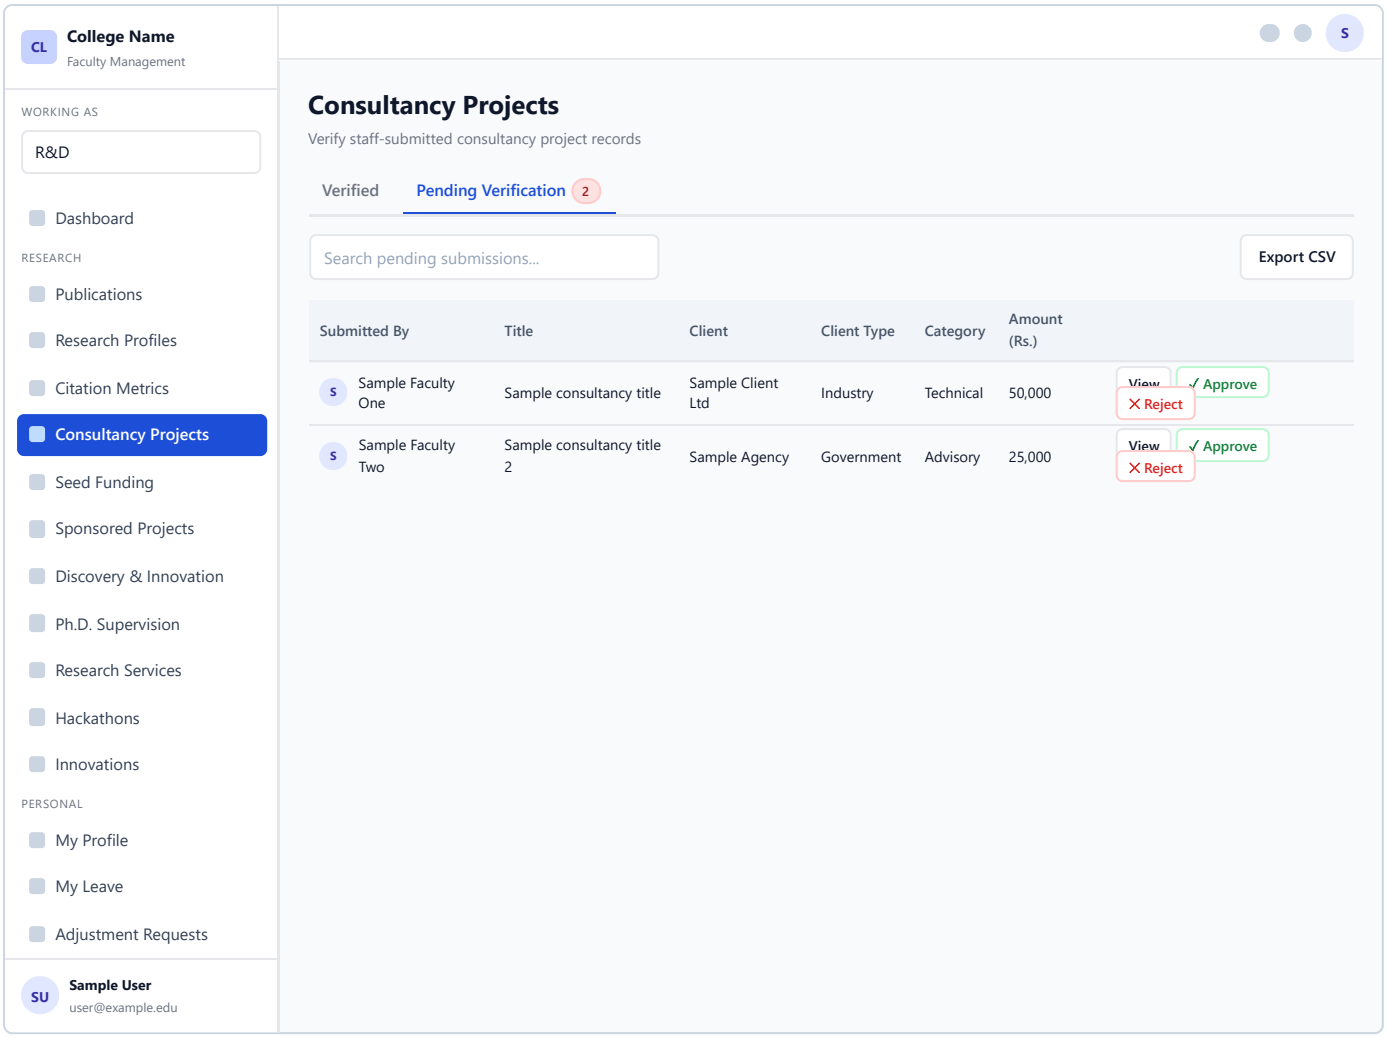

Figure 7. Consultancy Projects (illustration with placeholder data)

Verifies consultancy projects staff report: the title, the client and its type, the category and the amount.

What the user does here

1. Open the **Pending Verification** tab to see submissions that staff have made and nobody has checked yet.
2. Press **View** to read the full submitted record (see Figure 15).
3. Press **Approve** to verify it, or **Reject** and type the reason. The reason is required, and the staff member is notified and can correct and resubmit.
4. Switch to the **Verified** tab to see everything already approved or rejected.

Seed Funding

`/r-and-d/seed-funding`

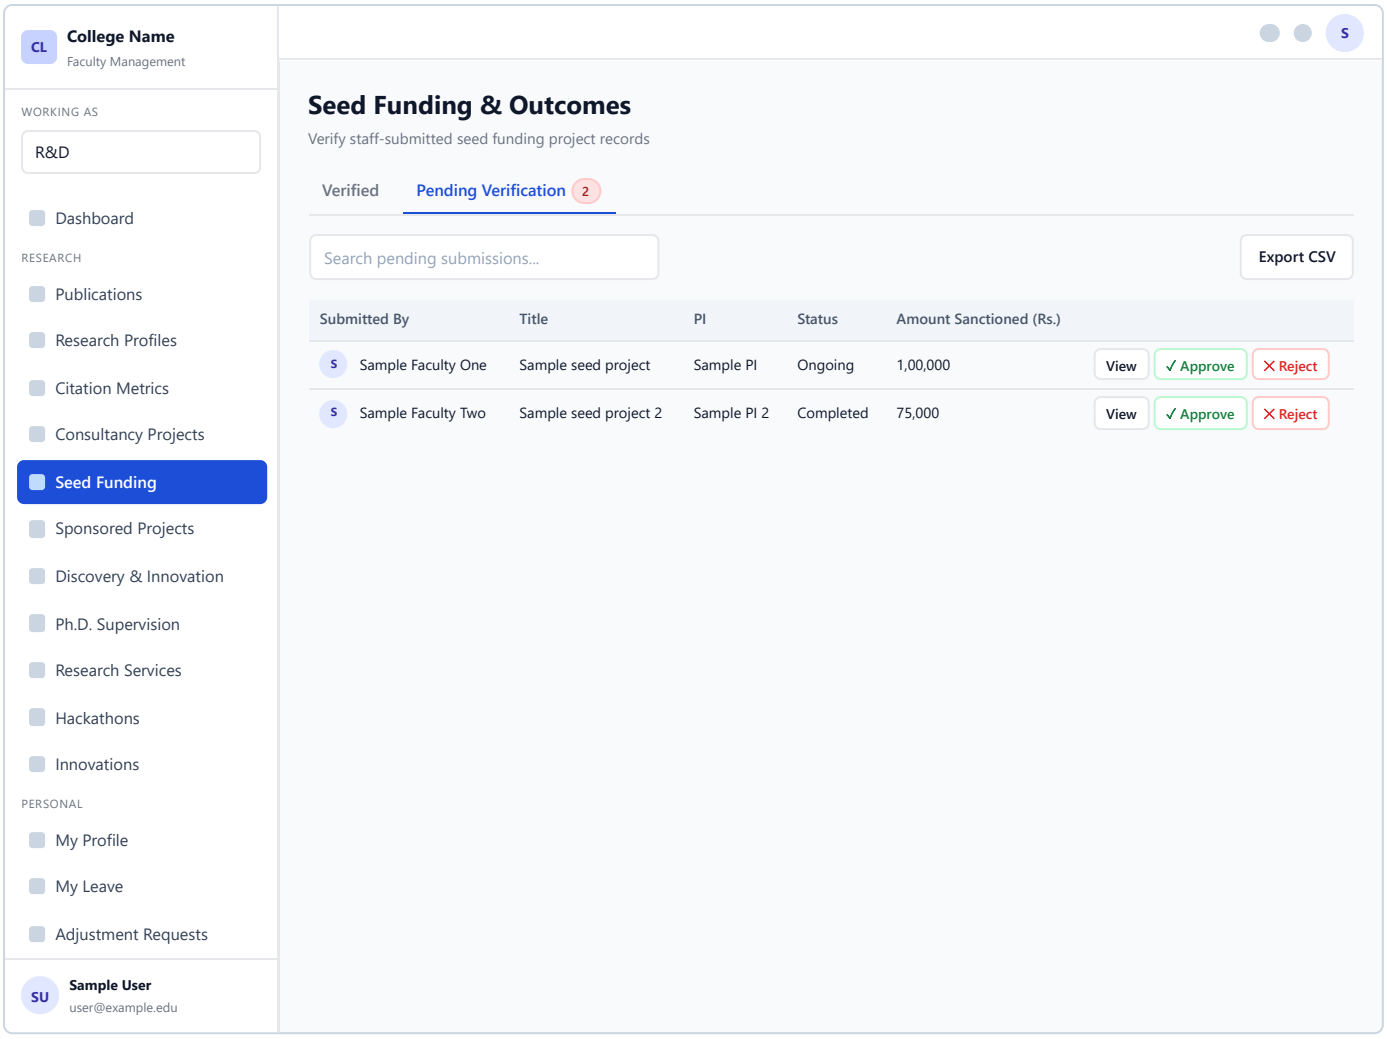

Figure 8. Seed Funding (illustration with placeholder data)

Verifies seed funding projects and outcomes: title, principal investigator, project status and the amount sanctioned.

What the user does here

1. Open the **Pending Verification** tab to see submissions that staff have made and nobody has checked yet.
2. Press **View** to read the full submitted record (see Figure 15).
3. Press **Approve** to verify it, or **Reject** and type the reason. The reason is required, and the staff member is notified and can correct and resubmit.
4. Switch to the **Verified** tab to see everything already approved or rejected.

Sponsored Projects

`/r-and-d/sponsored-projects`

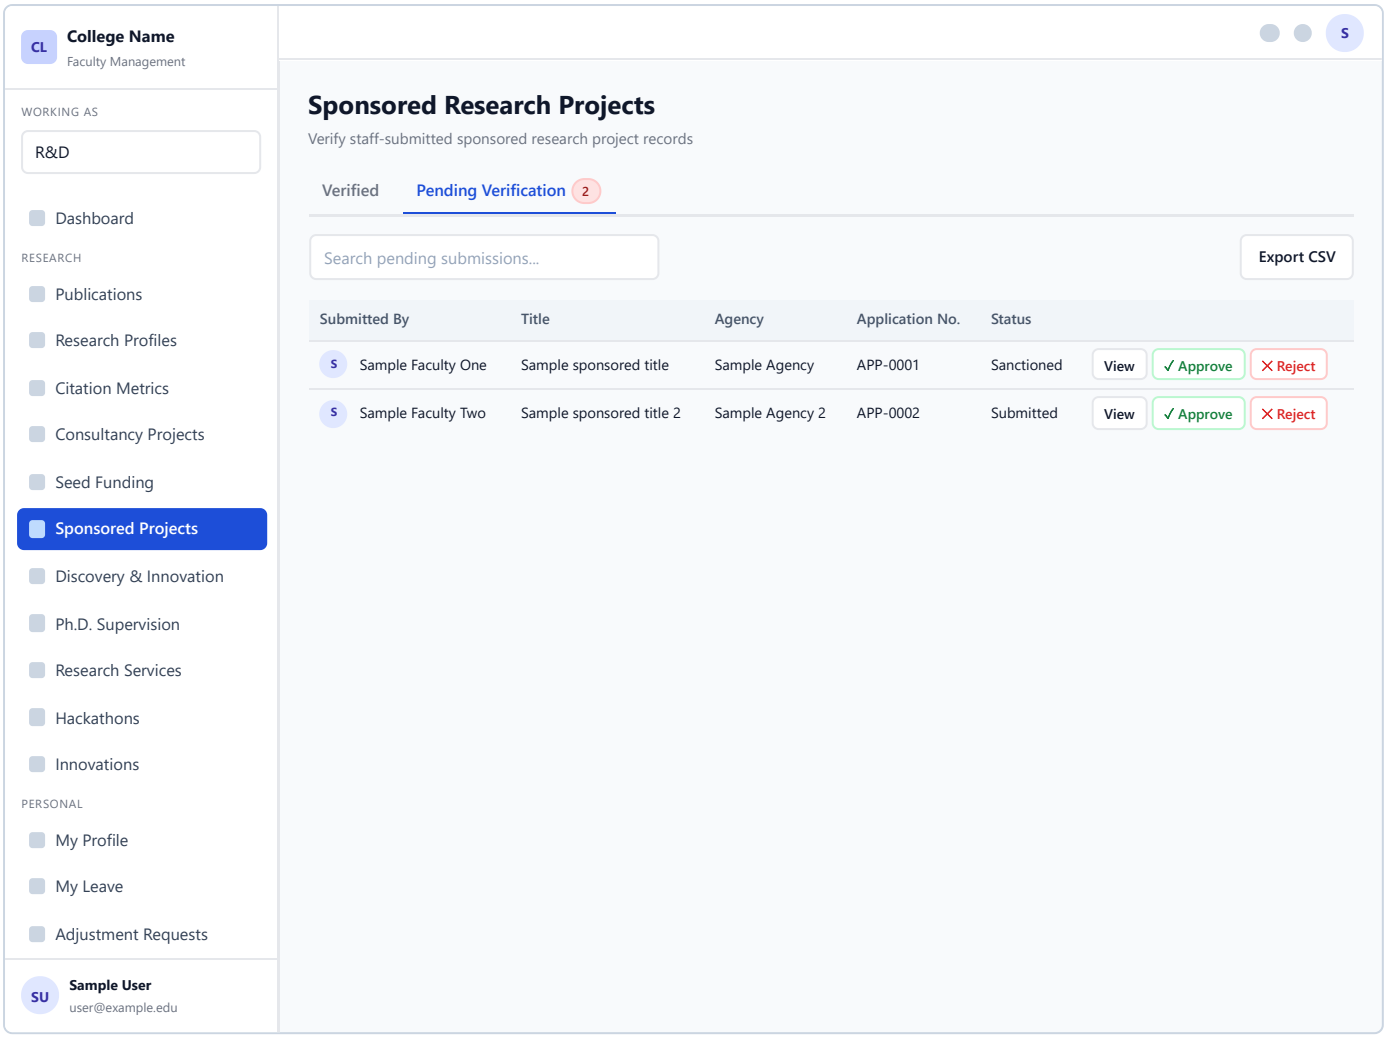

Figure 9. Sponsored Projects (illustration with placeholder data)

Verifies sponsored research projects: title, funding agency, application number and project status.

What the user does here

1. Open the **Pending Verification** tab to see submissions that staff have made and nobody has checked yet.
2. Press **View** to read the full submitted record (see Figure 15).
3. Press **Approve** to verify it, or **Reject** and type the reason. The reason is required, and the staff member is notified and can correct and resubmit.
4. Switch to the **Verified** tab to see everything already approved or rejected.

Discovery & Innovation (IPR)

`/r-and-d/discovery-innovation`

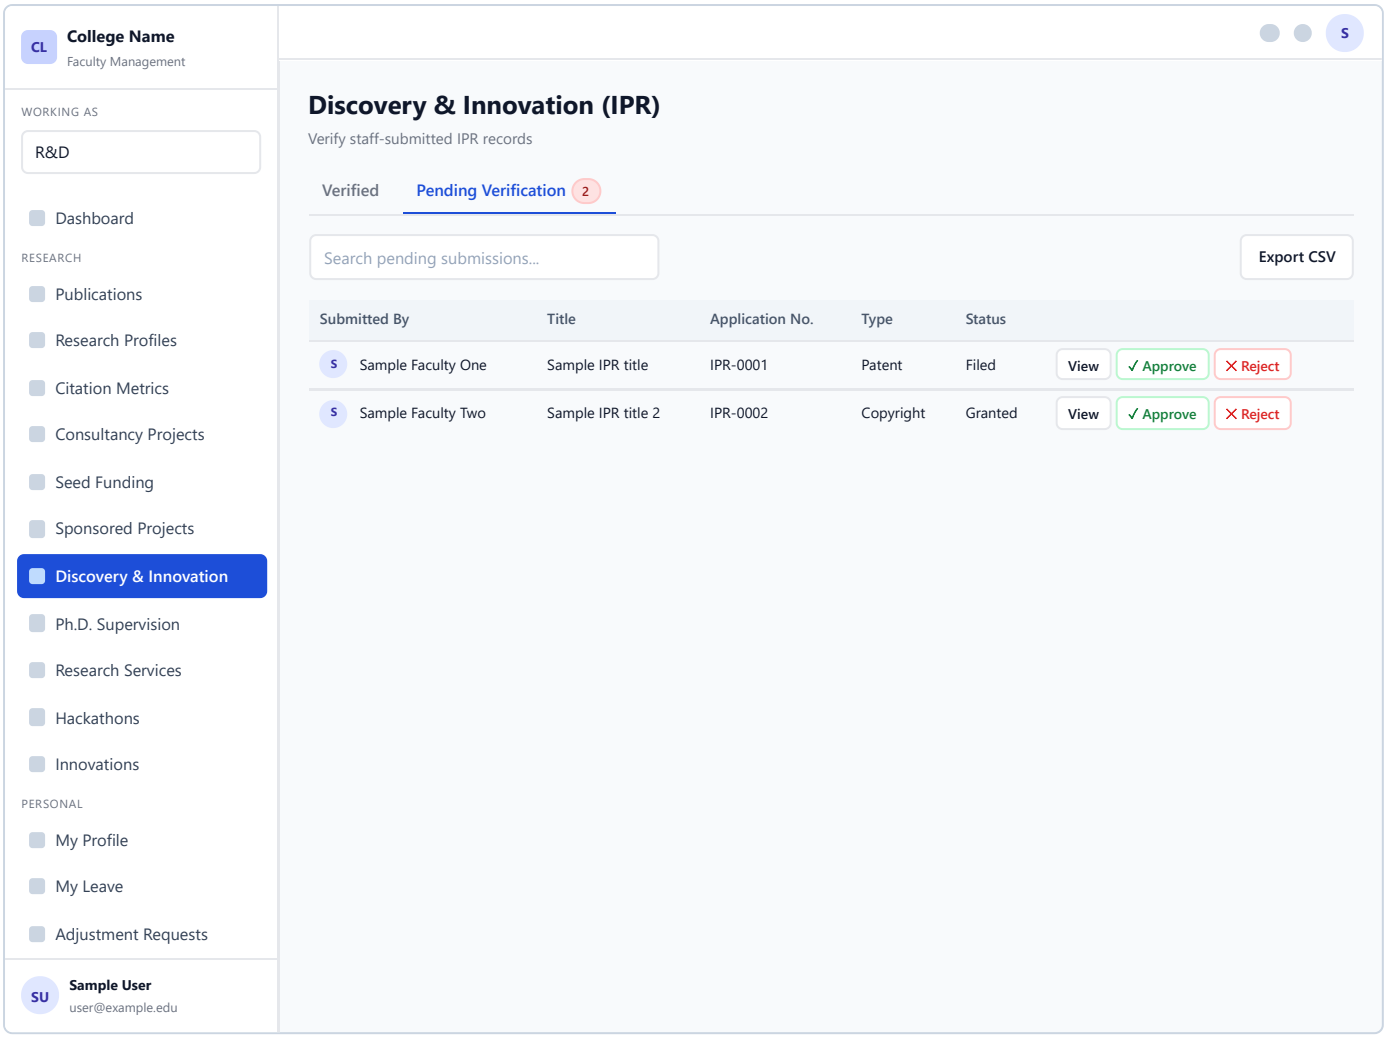

Figure 10. Discovery & Innovation (IPR) (illustration with placeholder data)

Verifies intellectual property records (patents, copyrights and similar): title, application number, type and status.

What the user does here

1. Open the **Pending Verification** tab to see submissions that staff have made and nobody has checked yet.
2. Press **View** to read the full submitted record (see Figure 15).
3. Press **Approve** to verify it, or **Reject** and type the reason. The reason is required, and the staff member is notified and can correct and resubmit.
4. Switch to the **Verified** tab to see everything already approved or rejected.

Ph.D. Supervision

/r-and-d/phd-supervision

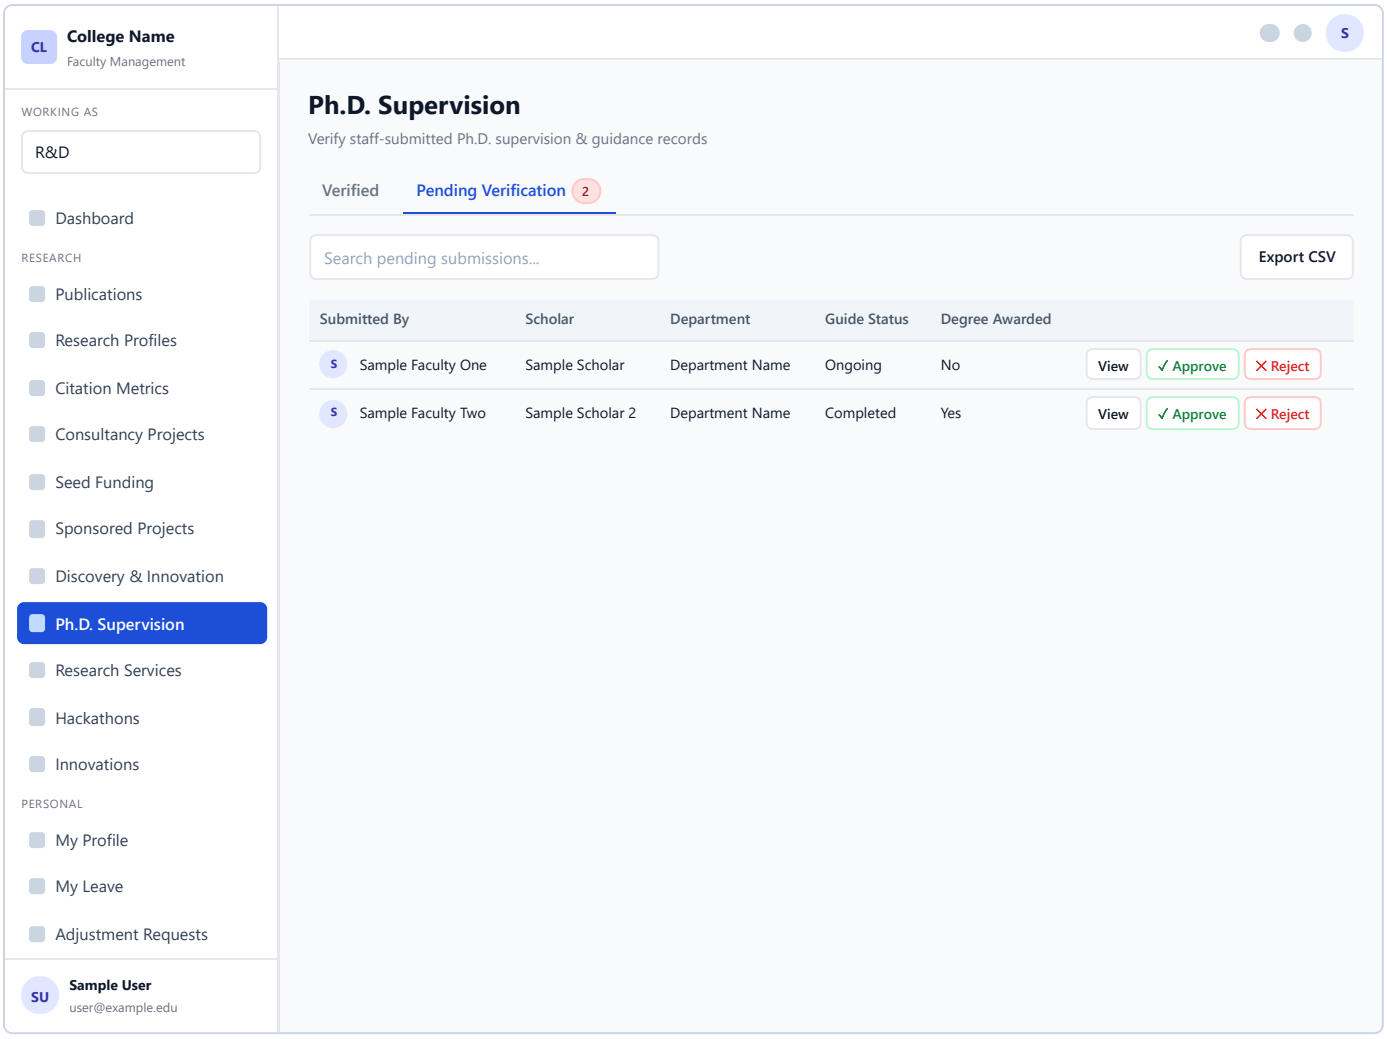

Figure 11. Ph.D. Supervision (illustration with placeholder data)

Verifies Ph.D. supervision records. The first column is the supervisor; the others show the scholar, department, guide status and whether the degree was awarded.

What the user does here

1. Open the **Pending Verification** tab to see submissions that staff have made and nobody has checked yet.
2. Press **View** to read the full submitted record (see Figure 15).
3. Press **Approve** to verify it, or **Reject** and type the reason. The reason is required, and the staff member is notified and can correct and resubmit.
4. Switch to the **Verified** tab to see everything already approved or rejected.

Research Services

`/r-and-d/research-services`

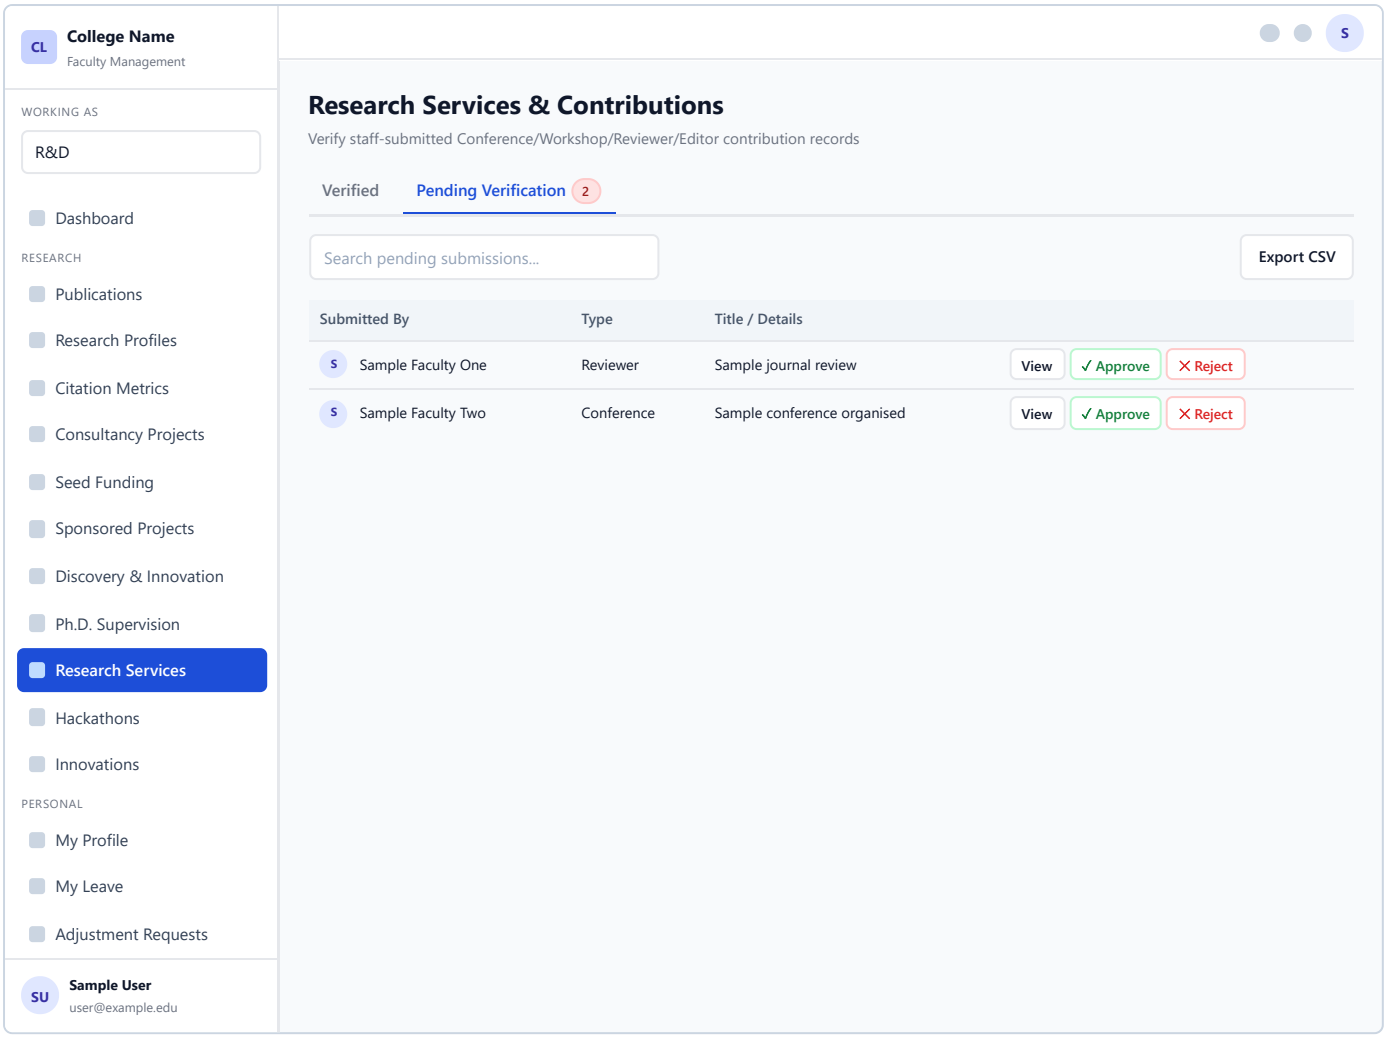

Figure 12. Research Services (illustration with placeholder data)

Verifies service contributions: conferences, workshops, reviewer and editor roles.

What the user does here

1. Open the **Pending Verification** tab to see submissions that staff have made and nobody has checked yet.
2. Press **View** to read the full submitted record (see Figure 15).
3. Press **Approve** to verify it, or **Reject** and type the reason. The reason is required, and the staff member is notified and can correct and resubmit.
4. Switch to the **Verified** tab to see everything already approved or rejected.

Hackathons

/r-and-d/hackathons

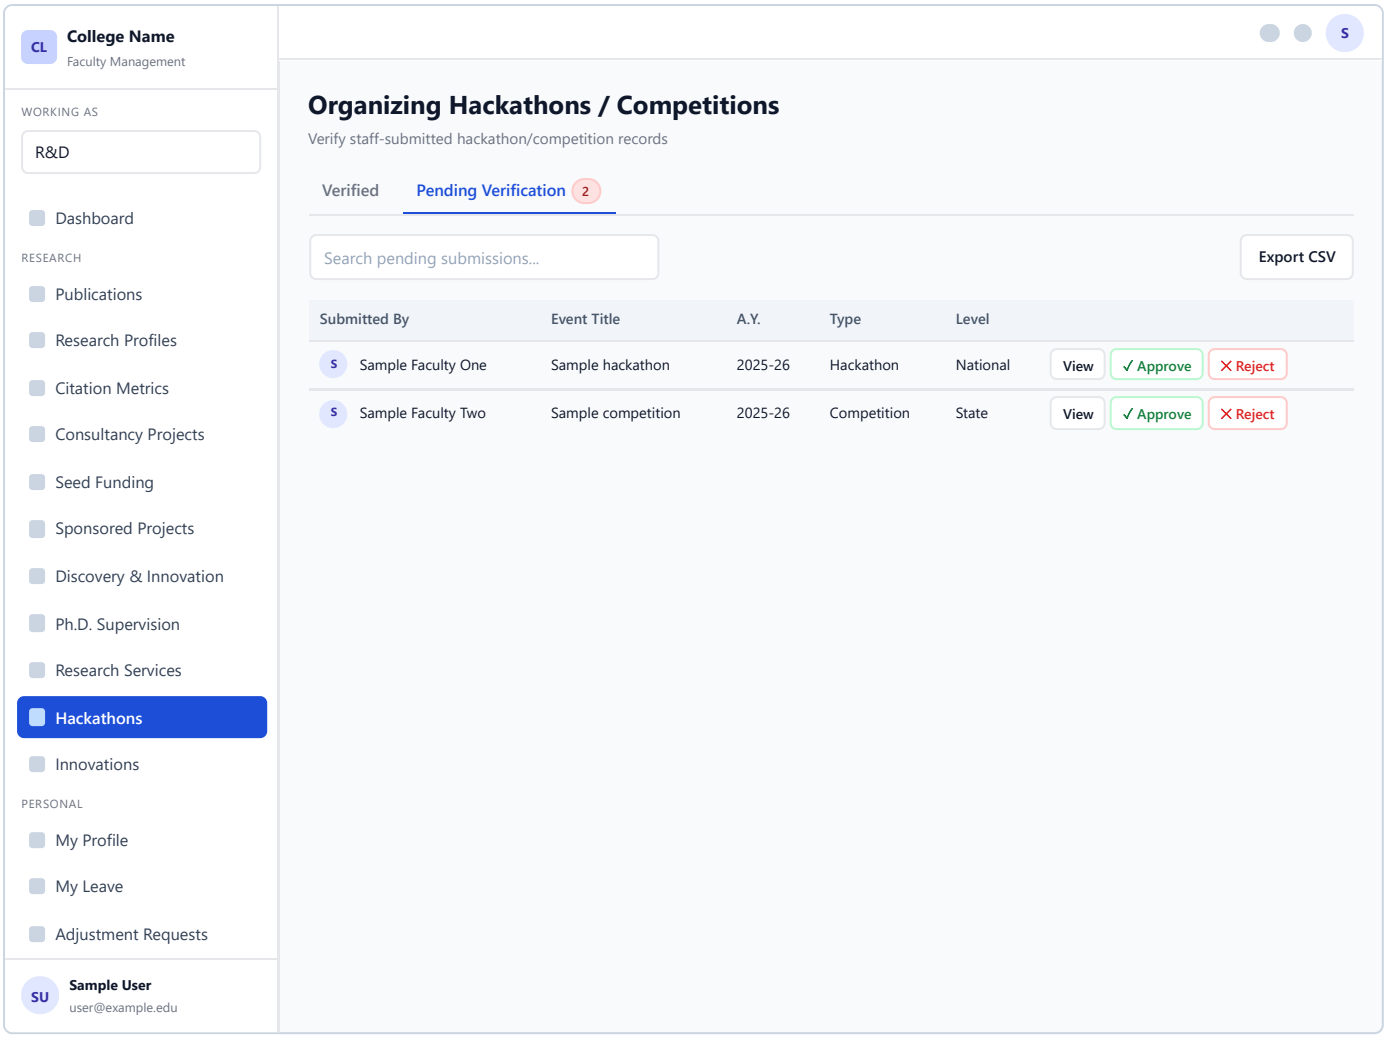

Figure 13. Hackathons (illustration with placeholder data)

Verifies hackathons and competitions that staff organised: event title, academic year, type and level.

What the user does here

1. Open the **Pending Verification** tab to see submissions that staff have made and nobody has checked yet.
2. Press **View** to read the full submitted record (see Figure 15).
3. Press **Approve** to verify it, or **Reject** and type the reason. The reason is required, and the staff member is notified and can correct and resubmit.
4. Switch to the **Verified** tab to see everything already approved or rejected.

Innovations

`/r-and-d/innovations`

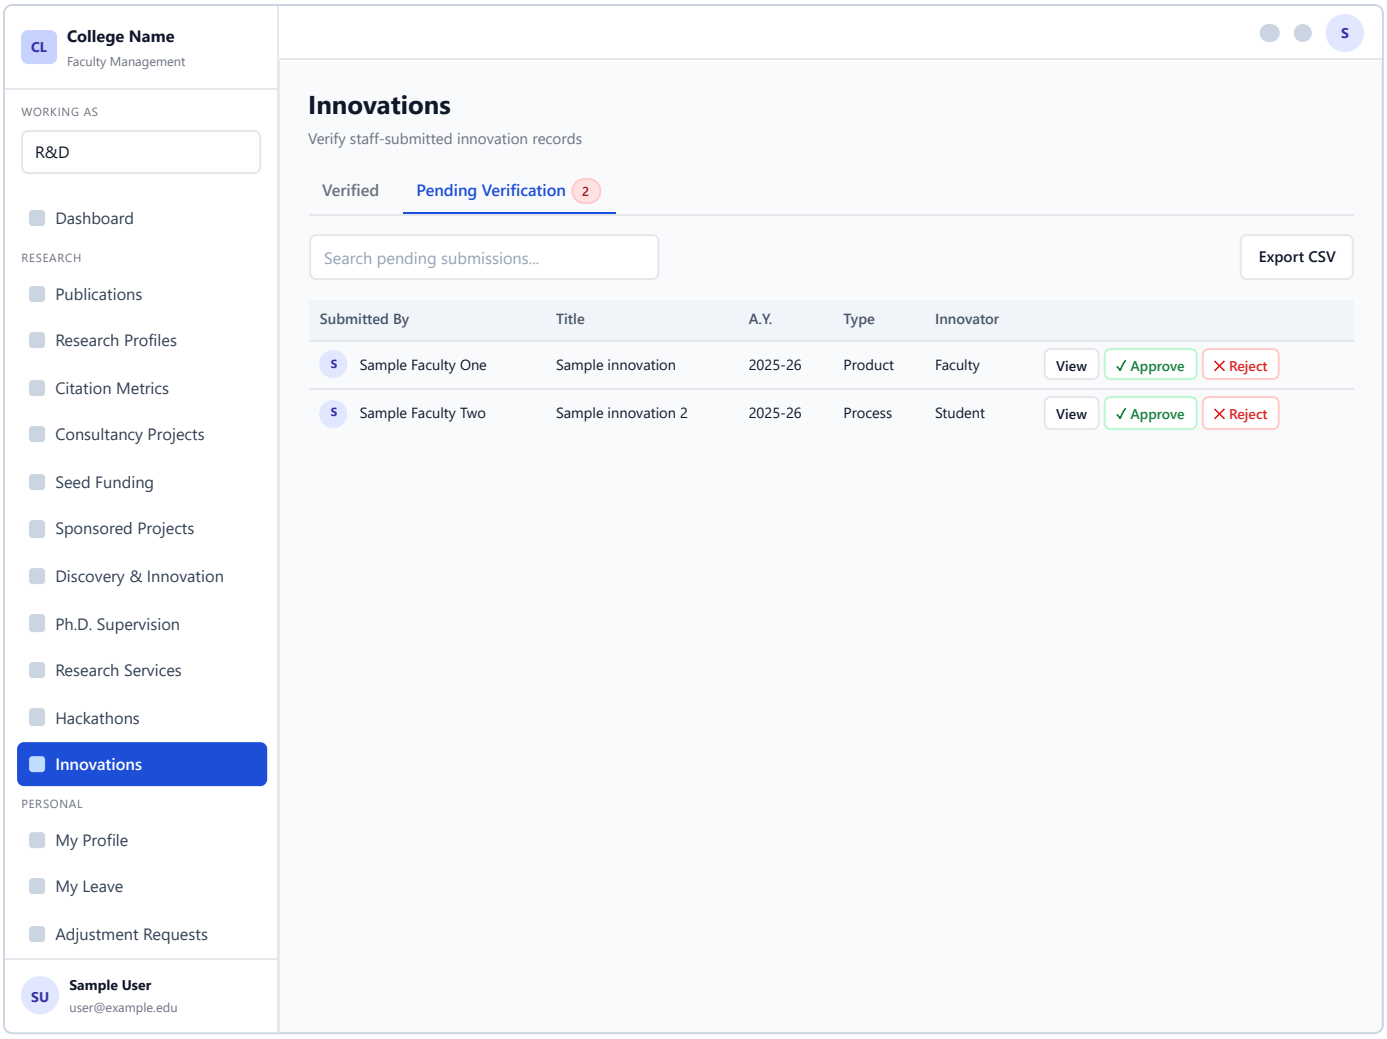

Figure 14. Innovations (illustration with placeholder data)

Verifies innovation records: title, academic year, type and whether the innovator was a student or faculty member.

What the user does here

1. Open the **Pending Verification** tab to see submissions that staff have made and nobody has checked yet.
2. Press **View** to read the full submitted record (see Figure 15).
3. Press **Approve** to verify it, or **Reject** and type the reason. The reason is required, and the staff member is notified and can correct and resubmit.
4. Switch to the **Verified** tab to see everything already approved or rejected.

Record Detail

`/r-and-d/record/[module]/[id]`

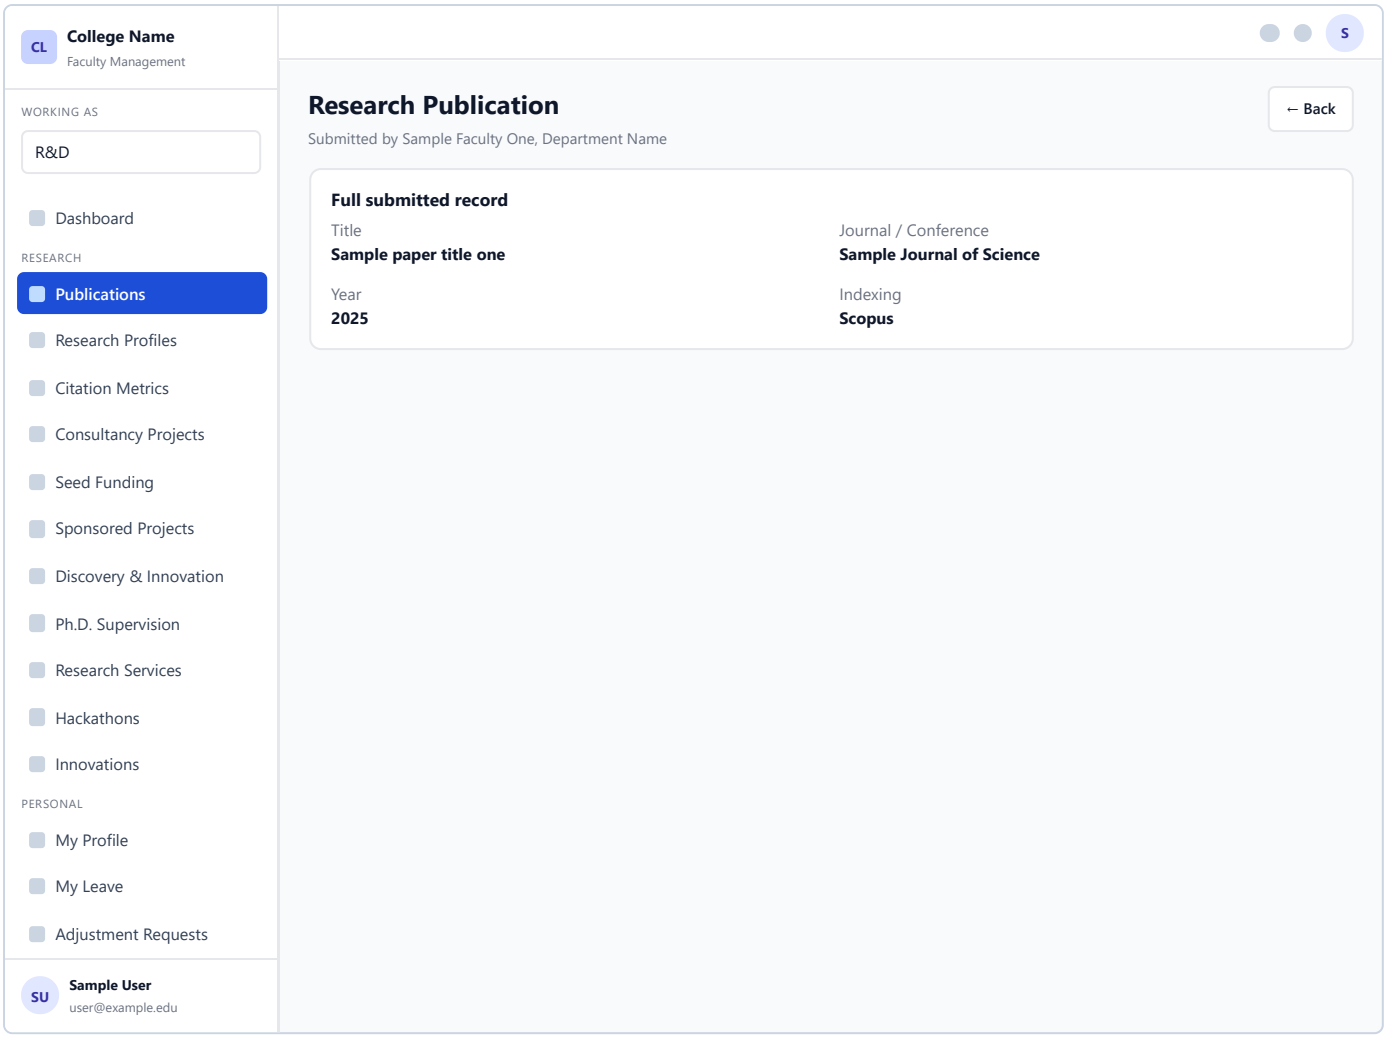

Figure 15. Record Detail (illustration with placeholder data)

Opens when a row is pressed in any module. It shows the full record as the staff member submitted it, with the owner named at the top, so the reviewer can read everything before deciding.

What the user does here

1. Read the record in full.
2. Press **Back** to return to the module's list, then approve or reject from there.

> The same layout is used for all eleven modules. The fields shown depend on the module.
