COLLEGE MANAGEMENT SYSTEM

User Manual

Exam Cell

A simple guide to setting up and running examinations in the system.

Version 1.0 | October 2026

Covers: exam settings, marks, Mid timings, circulars, guidelines, seating plans and attendance reports.

1. About this manual

This manual is for Exam Cell staff. It explains each task in the order you do it: set the number of Mids, set the marks, publish dates, share notices, plan seating and check attendance.

> **About the screenshots.** The screens in this manual show **sample data**: example courses, students, dates and marks. Your own college data will look different, but the screens and steps are the same.

The work in one view

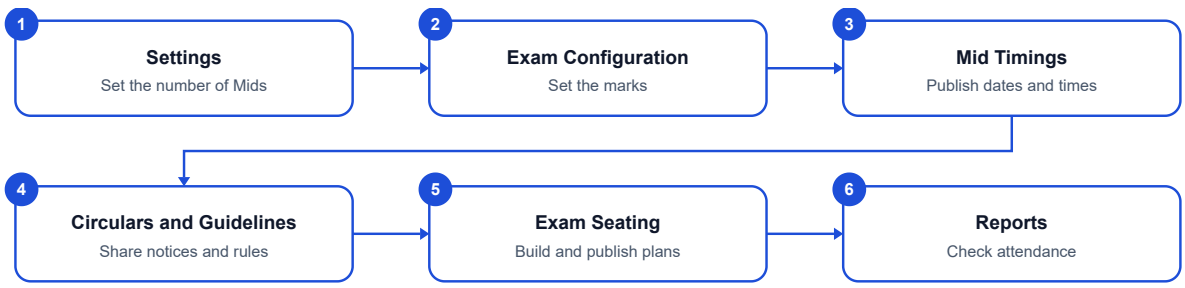

Figure 1. The Exam Cell workflow.

Who can do what

Task	Who can do it
Set Mids, marks, timings, circulars, guidelines and seating plans	Exam Cell only
View these items	Exam Cell, Principal and Vice Principal. HODs and Faculty can view exam configurations.
Create exam rooms	College Office
Enter internal marks	Faculty, using the marks structure you set

The system checks your role on every action. A person without permission cannot change exam set-up, even with a direct link.

2. Before you start

Other teams prepare the information you need. Check that these are ready:

- **Courses, branches and years taught.** Set by the Principal or College Office.
- **Sections and students.** Enrolled by the College Office. Seating needs students.
- **Exam rooms.** Created by the College Office. Each room has a name, block, floor, number of benches and students per bench (1 to 3).

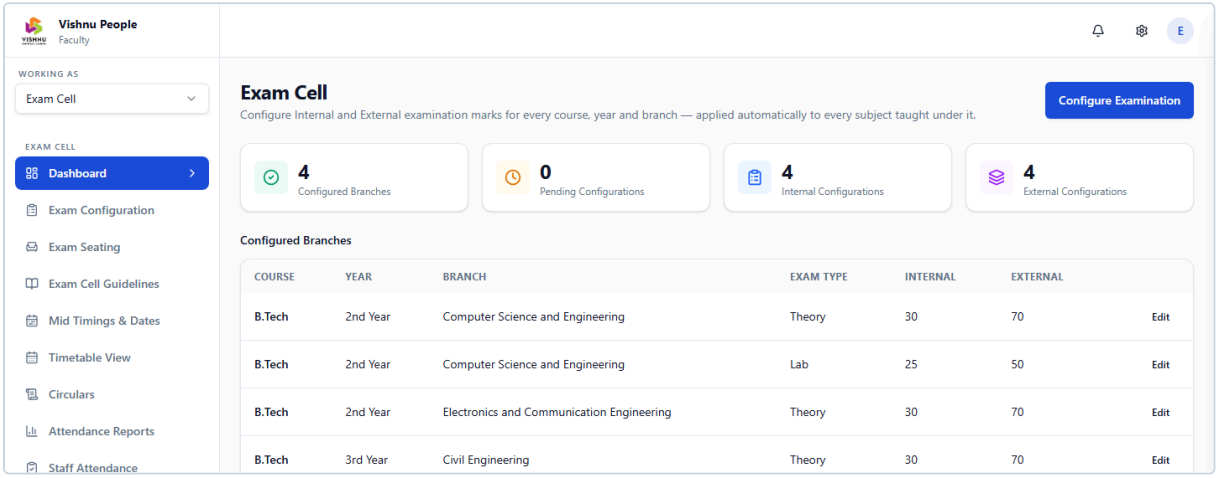

Figure 2. The Exam Cell dashboard (sample data). It lists every branch that is already configured.

3. Step 1: Settings

Tell the system how many Mid exams your college holds. Do this first. You cannot publish Mid timings until it is set.

1. Open **Settings**.
2. Enter a whole number from 1 to 10 under **Mid Exams**.
3. Click **Save**.

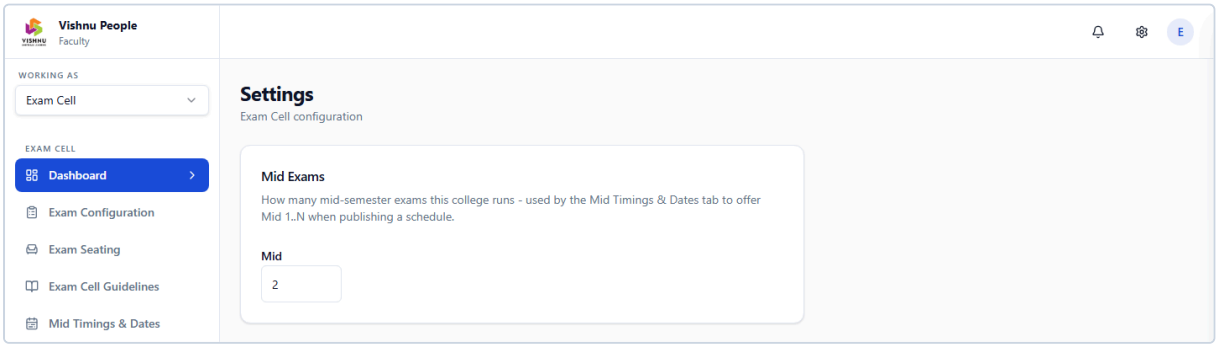

Figure 3. Settings: the college holds 2 Mid exams (sample data).

4. Step 2: Exam Configuration

Here you set how marks are given. One configuration covers one **course, year, branch and exam type** (Theory or Lab). It applies to every subject of that type under it, so you do not set marks subject by subject.

1. Open **Exam Configuration**.
2. Choose the **Course**, **Year**, **Branch** and **Exam Type**, then click **Load Configuration**.
3. Enter the **Internal** and **External** maximum marks.
4. Add the internal marks parts, such as Assignments and Quizzes. Give each a name and its marks.
5. Check that the total at the bottom matches the Internal maximum. It turns green when correct.
6. Click **Save Configuration**.

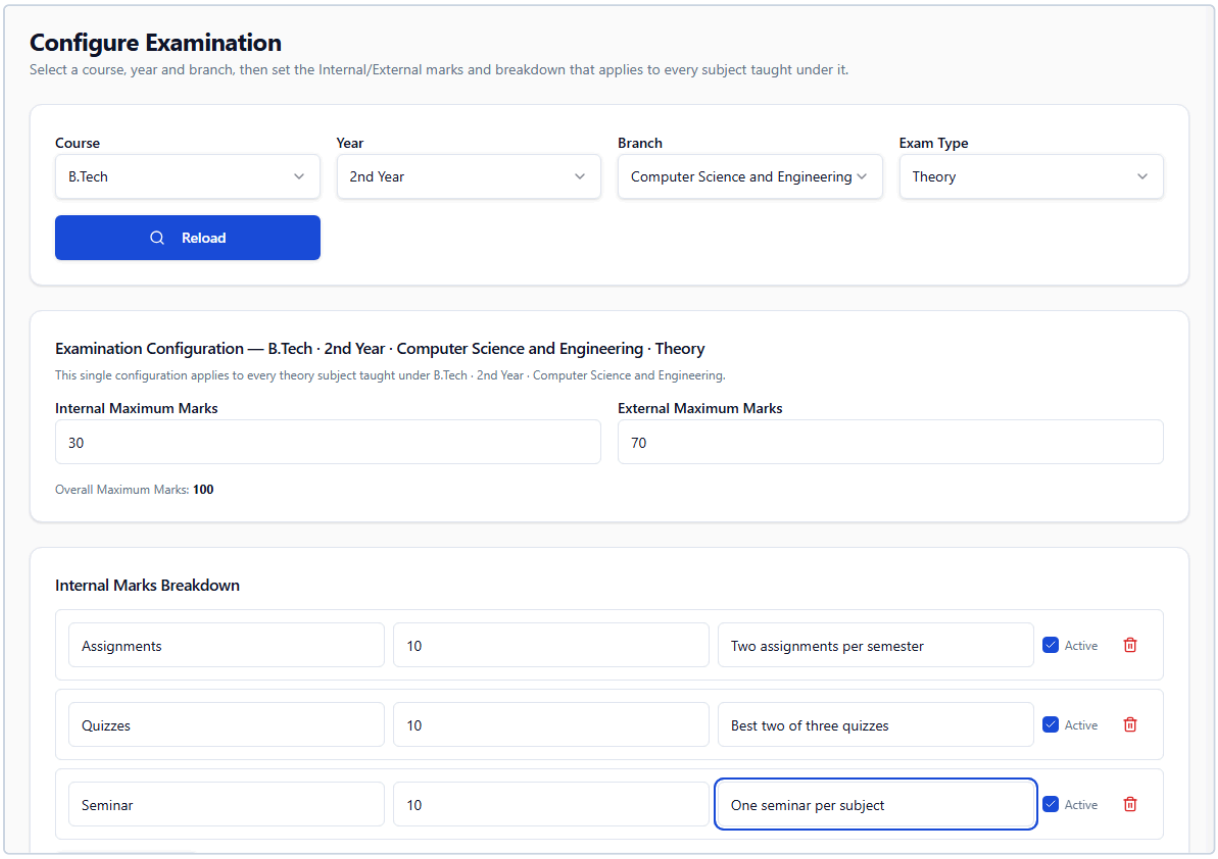

Figure 4. A completed configuration (sample data). The three parts add up to 30 marks, so the total shows 30 / 30.

> **Check before you save.** A saved configuration cannot be changed. It opens in view-only mode, as shown below, and saving the same course, year, branch and type again is refused.

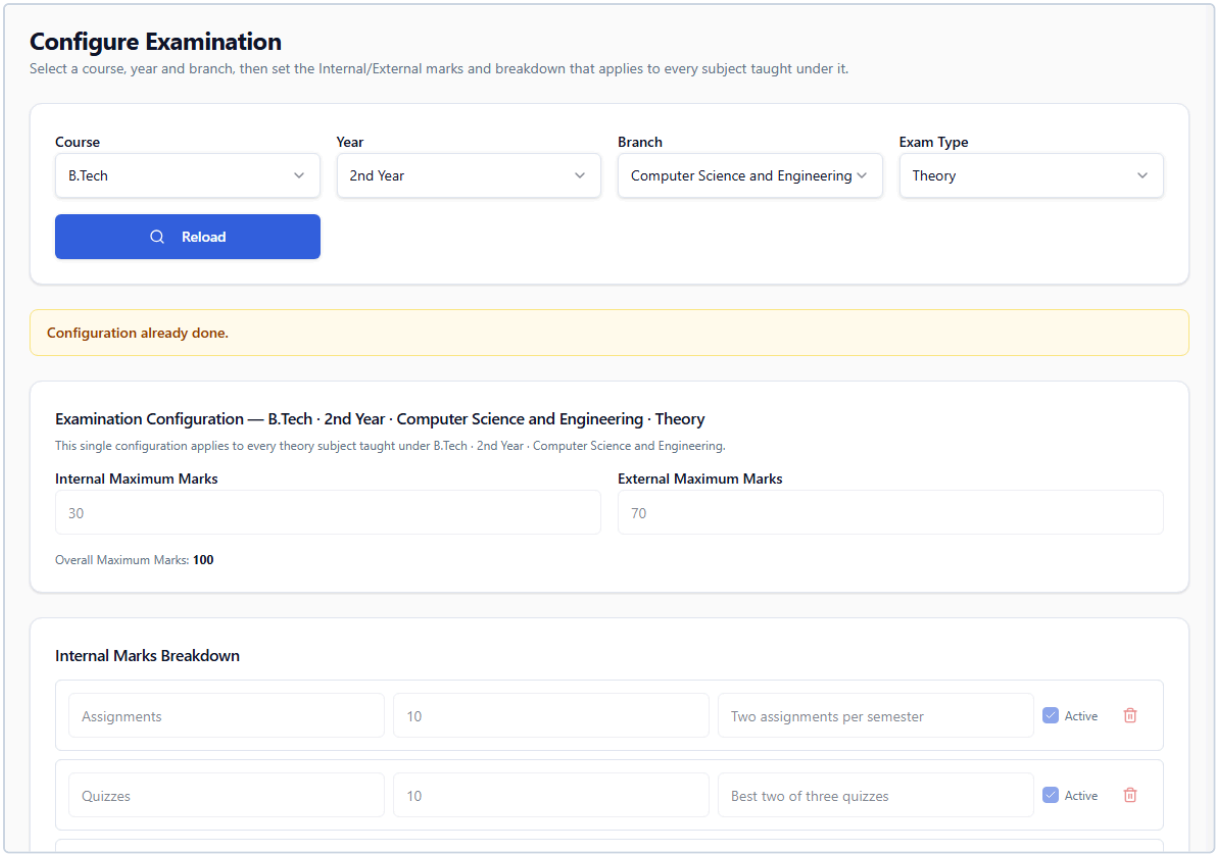

Figure 5. A saved configuration opened again. The fields are greyed out and the page says “Configuration already done.”

Rules

Rule	Message you will see
The parts must add up to the Internal maximum	Breakdown total must equal the Internal Maximum Marks (30). Current total: 25.
Only years that the branch teaches can be chosen	The branch is not assigned to teach that year
Only one configuration for each course, year, branch and type	Configuration already done

After you save, Faculty can enter internal marks for those subjects.

5. Step 3: Mid Timings

Publish the date and time for each Mid. One entry covers one **course, semester and Mid number**.

1. Open **Mid Timings & Dates** and click **Publish Timings**.
2. Choose the **Course**, **Semester** and **Mid**.
3. Enter the from and to **dates** and **times**.
4. Click **Publish**. Use **Edit** or **Delete** on a card to change it later.

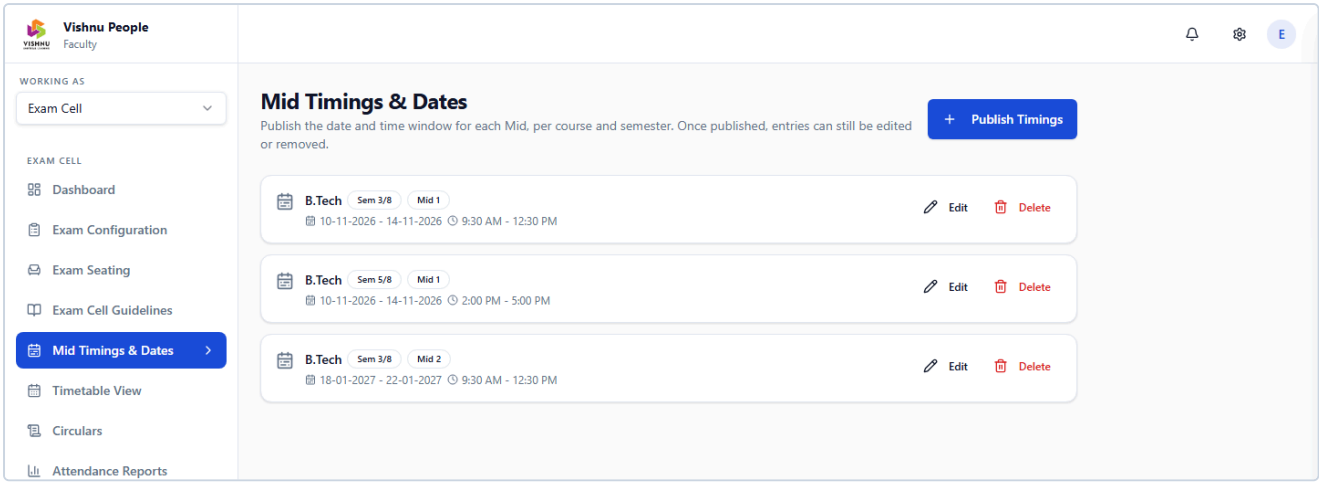

Figure 6. Published Mid timings (sample data).

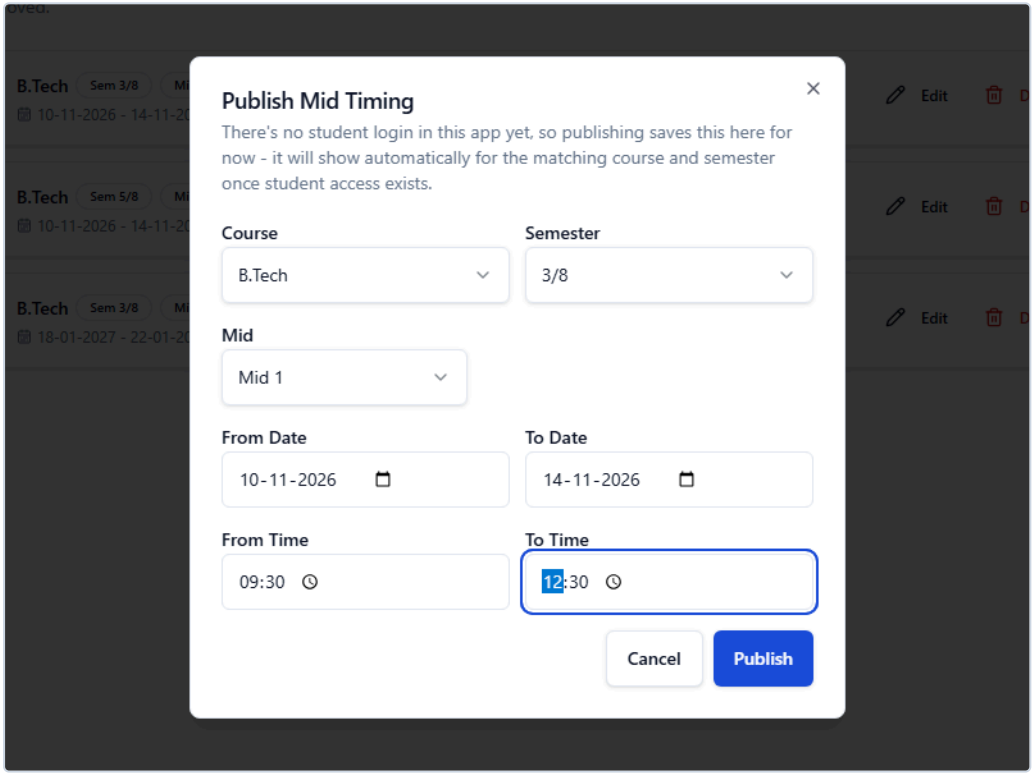

Figure 7. The Publish Mid Timing form with example values.

Rules: the Mid number must not be higher than the Mid count in Settings. The start date cannot be in the past. The end date cannot be before the start date. On a single day, the end time must be after the start time.

6. Step 4: Circulars

Share exam notices in one of two ways. Both appear in one list, newest first.

Way	Use it when	You provide
Upload Circular	You already have a notice file	A PDF or Word (.docx) file, up to 10 MB
Share Circular	You want to type a short notice	Course, semester, date, subject and body

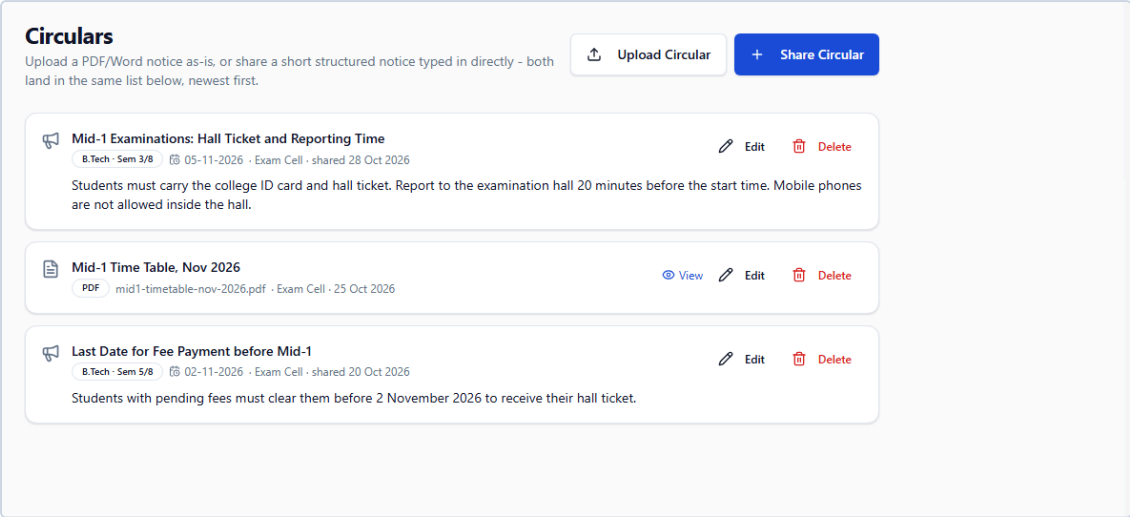

Figure 8. The circulars list (sample data): two typed notices and one PDF.

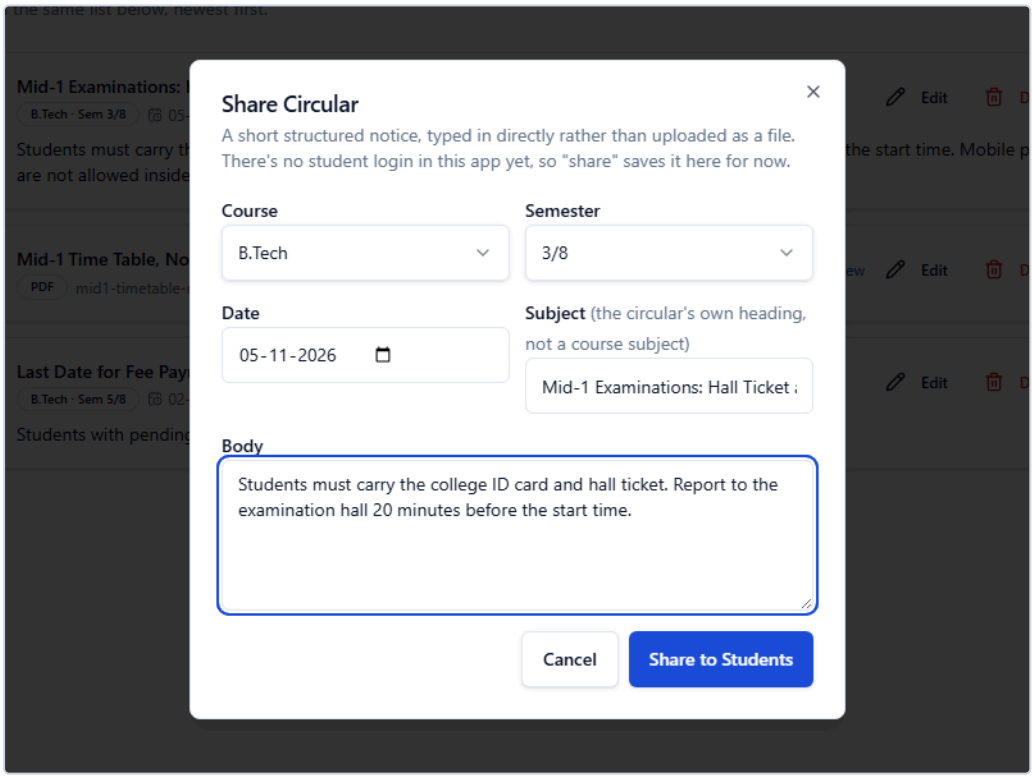

Figure 9. The Share Circular form with example text. The date cannot be in the past.

7. Step 5: Guidelines

Upload a PDF or Word file and the system turns its text into a list of points. Always read the points after uploading and edit anything that was read wrongly.

1. Open **Exam Cell Guidelines** and click **Upload Guidelines**.
2. Choose a PDF or Word (.docx) file, up to 10 MB.
3. Check the list of points. Use **Edit** to correct them.

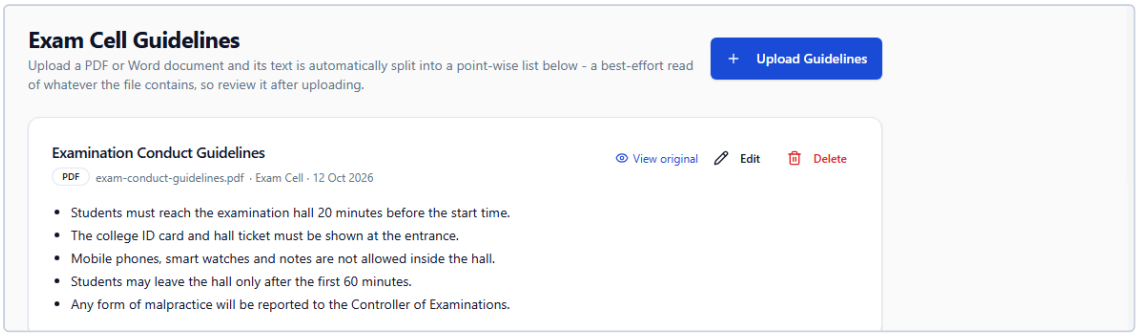

Figure 10. A guideline document split into points (sample data).

Scanned (image-only) files and password-protected files cannot be read. Use a normal text file instead.

8. Step 6: Exam Seating

A seating plan decides where each student sits. A plan starts as a **Draft**. You review it, fix any problems, and then **Publish** it.

Two ways to build a plan

	Quick auto-fill plan	Bench-wise plan
Best for	A fast plan, one student per bench	Rooms with 2 or 3 students per bench, from different branches
How	Tick the sections and rooms. Students are placed by roll number.	Create the plan, then add one section at a time.
Button	Allot seats	Create and start allotting

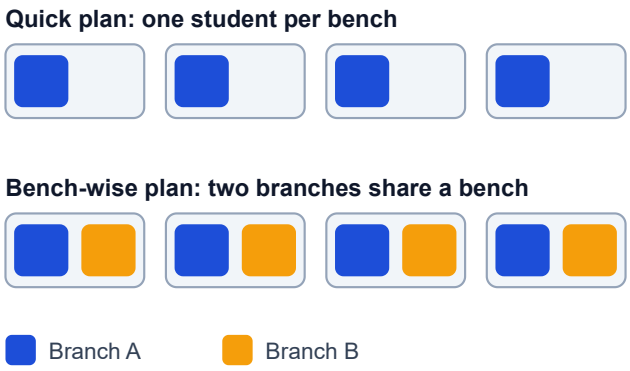

Figure 11. The two seating styles.

Quick auto-fill, step by step

1. Enter an **Exam name**.
2. Tick the **sections**. They are seated in the order you tick them (#1, #2).
3. Tick the **rooms**. Rooms fill in order of block, floor and room number.
4. Click **Allot seats**. The page shows how many students and seats you have.

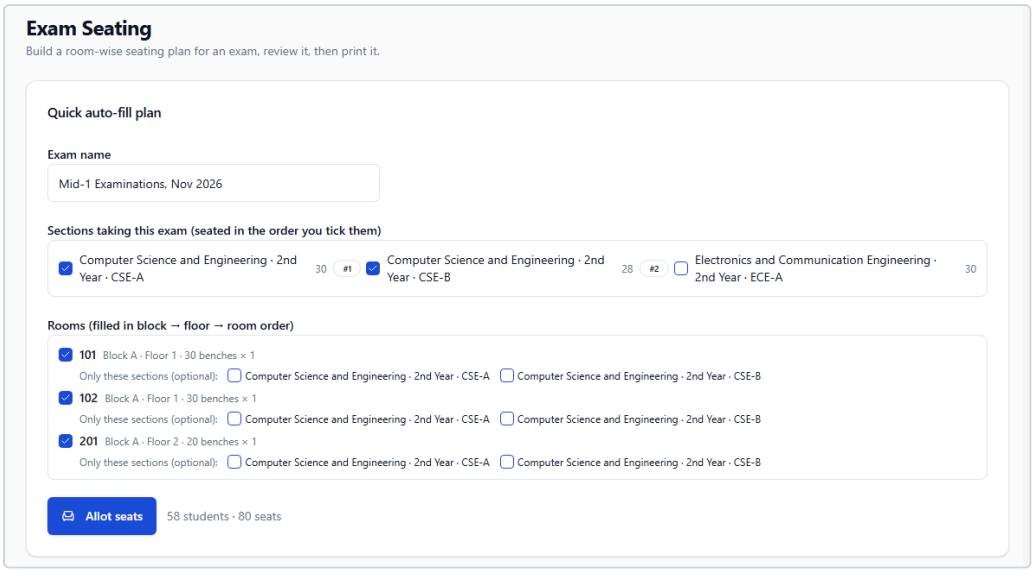

Figure 12. The seating setup page (sample data): two sections ticked, three rooms, and the list of plans.

Review the draft

Each room shows its students by seat. If a student has no seat, they are listed in a red box. Use **Move** to place them in a room that has space. A full room does not accept more students.

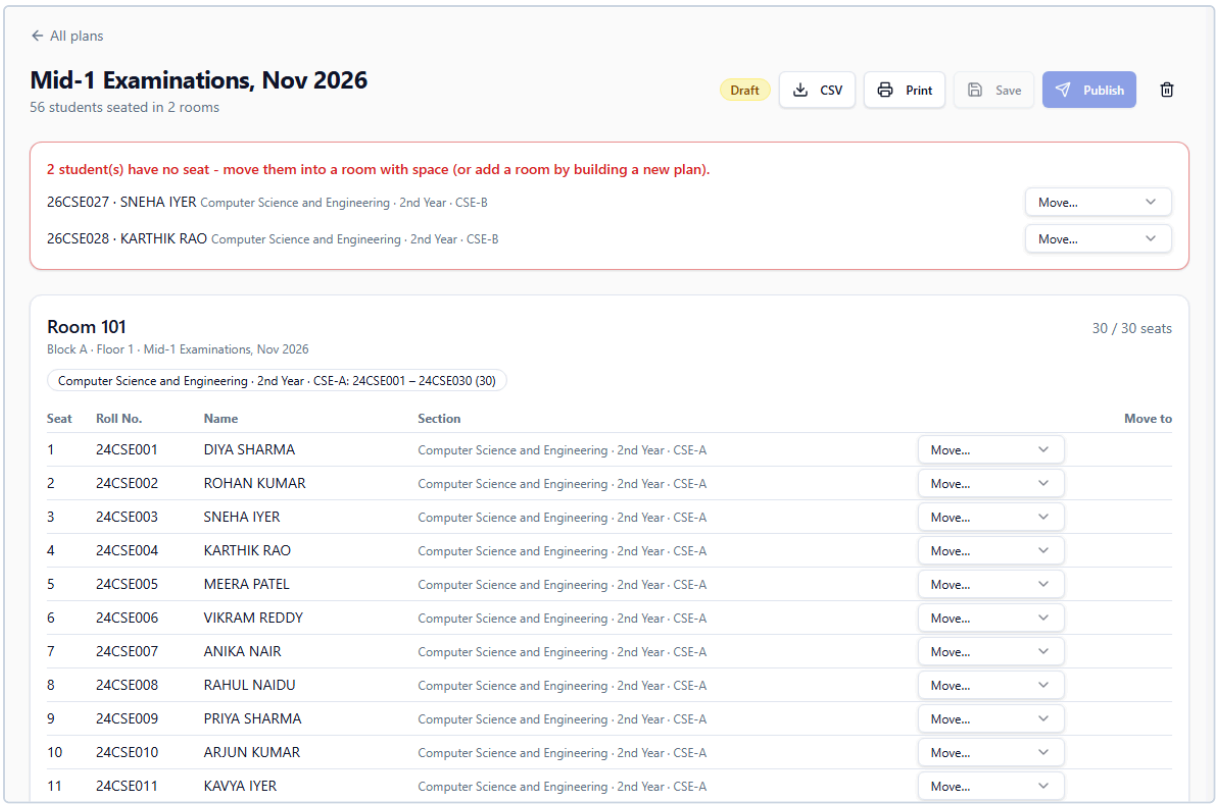

Figure 13. A draft plan (sample data). Two students have no seat. Publish stays off until every student is placed.

Bench-wise plans

After you create a bench-wise plan, use **Allot a section** to add one section at a time. Each bench has Seat A and Seat B, and the two seats always belong to different branches.

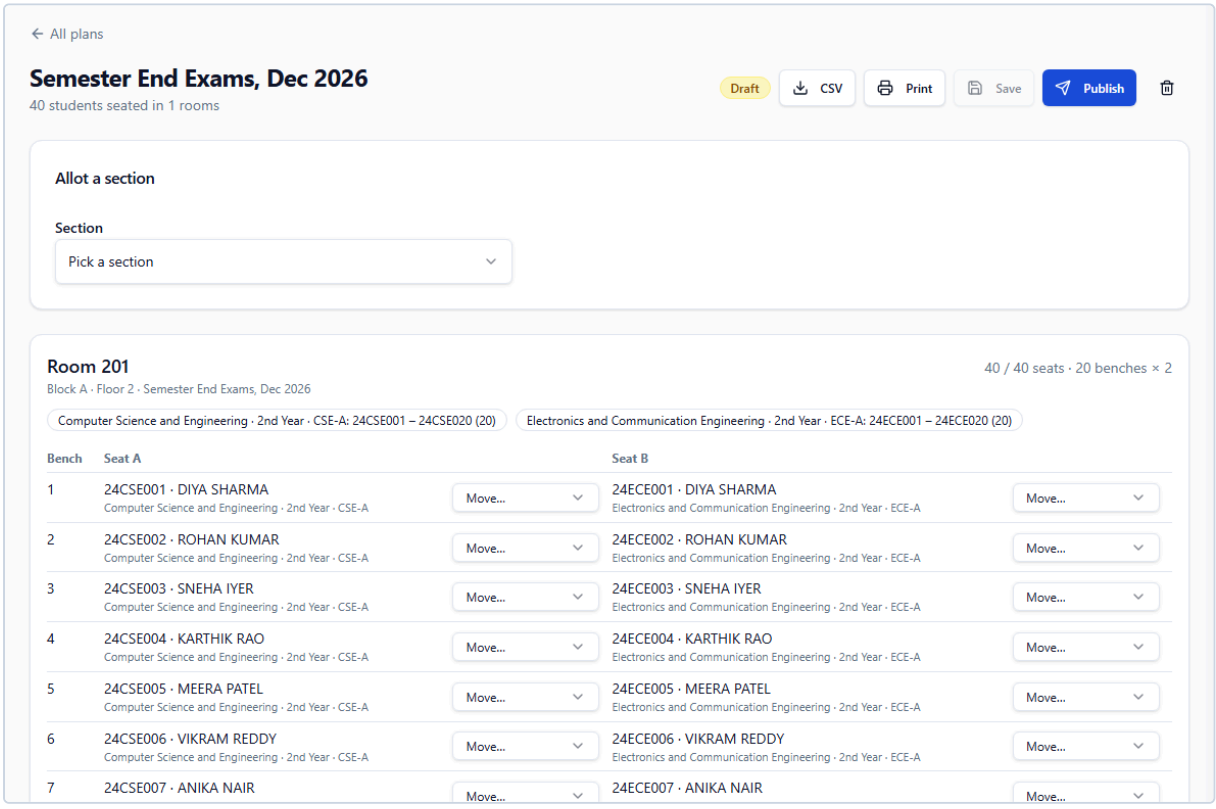

Figure 14. A bench-wise plan (sample data). Each bench holds one CSE student and one ECE student.

Publish, print and export

1. Make sure no student is left without a seat.
2. Click **Publish**.
3. Click **Print**. Each room prints on its own page. Use **CSV** to download a spreadsheet.

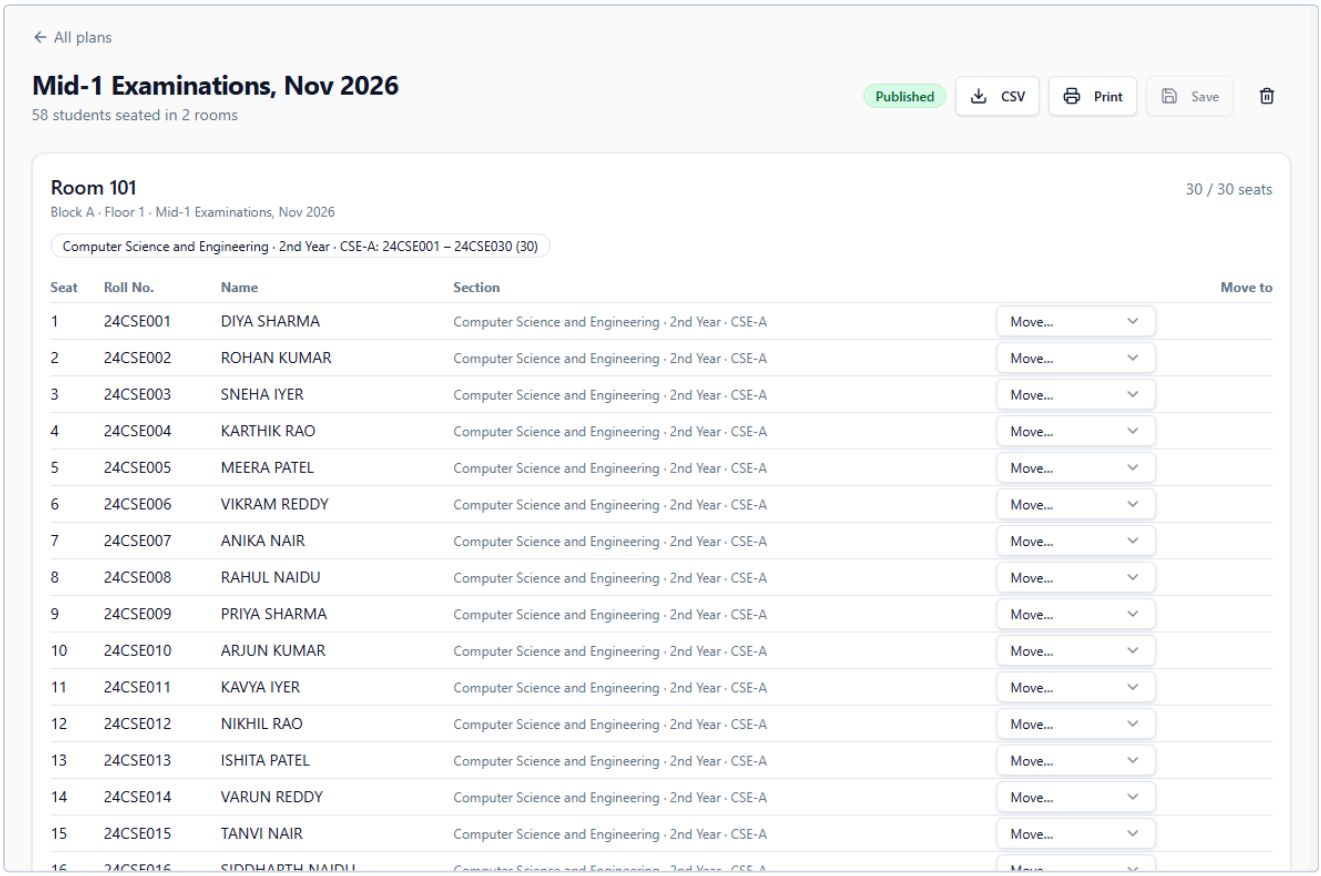

Figure 15. A published plan (sample data). Editing is no longer possible; CSV and Print remain.

> **A published plan is final.** It cannot be unpublished or edited. If something is wrong, build a new plan. You can delete a draft after confirming.

9. Step 7: Attendance Reports

See each student's attendance percentage for a course, department and semester. You can pick one section, or set a range such as “below 75%” to find students with low attendance.

1. Open **Attendance Reports**.
2. Choose the **Course**, **Department** and **Semester**. Section is optional.
3. Click **Below 75%**, or enter your own From and To percentages.
4. Click **Generate Report**. Use **Download PDF** or **Download Excel** to save it.

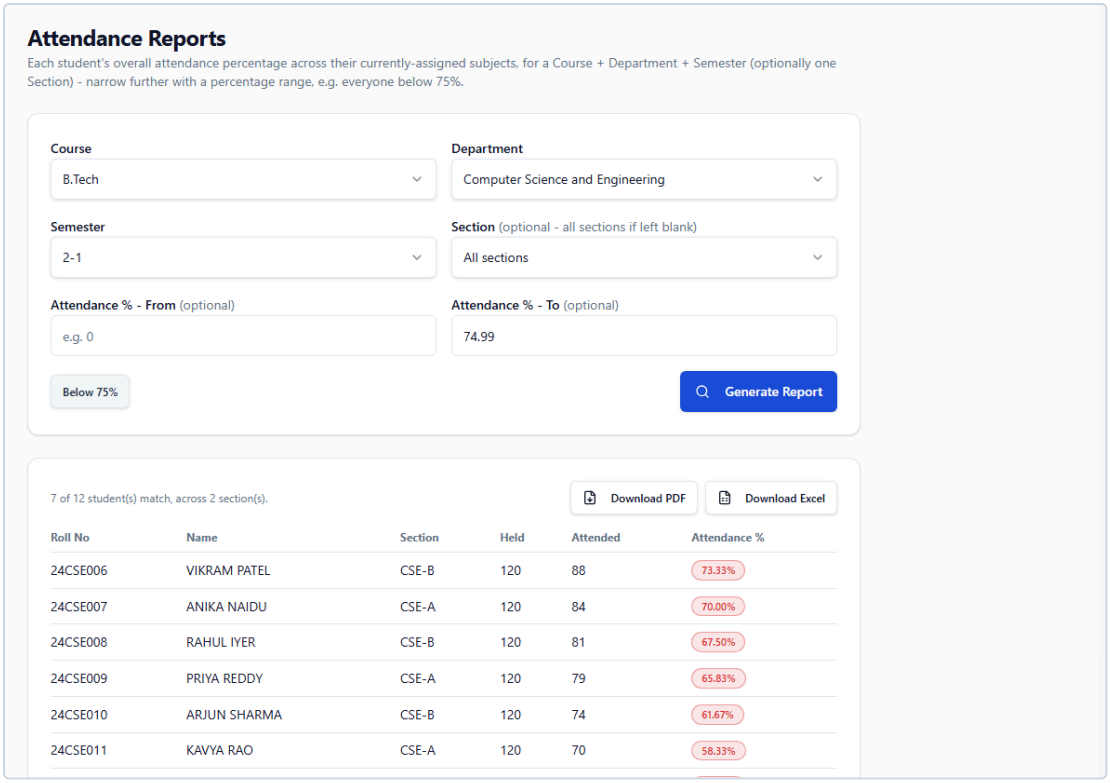

Figure 16. A report of students below 75% (sample data).

10. Your own tools

Exam Cell staff also have the same personal pages as other office staff.

Page	What it is for
My Profile	View your details and photo
My Attendance and Staff Attendance	Mark your daily attendance (checked by face and location) and see your monthly record
My Leave	Apply for leave and see your balance and history
Adjustment Requests	Reply to requests to cover someone's duties
Timetable View	See published class timetables (read only). Download as PDF or Excel.

11. Who uses your work

What you set up	Who can see it	Why it matters
Exam Configuration	Faculty, HOD, Principal, Vice Principal	Faculty see the marks structure when they enter internal marks.
Mid timings, circulars, guidelines, seating plans	Principal and Vice Principal	They can check dates, notices and plans.

Please note. At present the system has no student login. The Mid timings and circulars forms say they are saved “here for now” and will reach students once student access exists. Share notices with students through your usual channels until then.

Marks entry depends on you. If a subject has no configuration, Faculty see: “This subject's internal exam has not been configured yet. Contact your Exam Cell.”

12. Common problems

Problem	Reason	What to do
Cannot publish a Mid timing	Mid count not set, or Mid number too high	Set or raise the count in Settings
Date is refused	A date is in the past, or the end is before the start	Choose a valid date range
Cannot save a configuration	The parts do not add up to the Internal maximum	Change the marks until the total matches
“Configuration already done”	That course, year, branch and type is saved	It is view only. Ask your administrator if a correction is truly needed
A year or branch is missing	The branch does not teach that year	Ask the Principal or College Office to set the years taught
File upload is refused	Not a PDF or .docx, or larger than 10 MB	Convert it and keep it under 10 MB
No rooms to choose	The College Office has not added rooms	Ask the College Office
Publish is off	Some students have no seat	Move each student into a room

13. Glossary

Term	Meaning
Configuration	The marks set-up for one course, year, branch and exam type
Internal / External marks	Marks given by the college during the term / in the final exam
Mid	A mid-semester exam, numbered from 1 up to the Mid count
Draft / Published	States of a seating plan. A published plan is final
Bench-wise plan	A plan where students from different branches share each bench
