

What the College Admin Does in the Faculty Management System

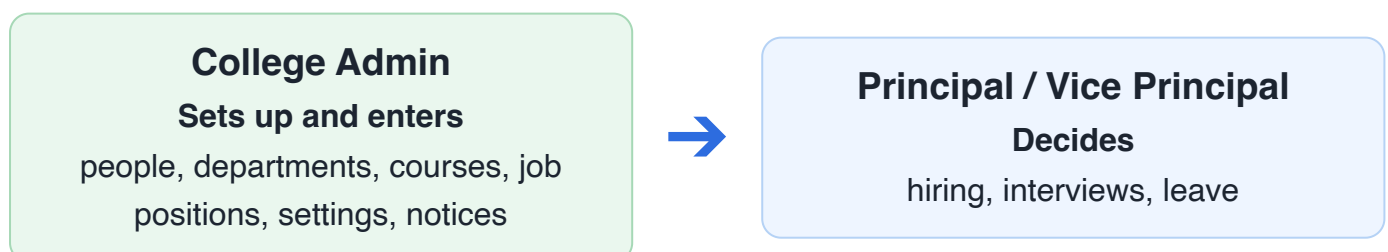

A simple, detailed guide from start to end. No technical words. It also shows how the College Admin is different from the Principal.

Words used in this guide

- **College Admin:** the college's office-in-charge login. It runs the daily setup work of the college.
- **Principal:** the head of the college. The Principal makes the big yes/no decisions.
- **Vice Principal:** the Principal's deputy.
- **HOD:** Head of Department.
- **Location Administration:** the office above colleges that looks after all colleges in one city or campus.
- **Super Admin:** the system owner who controls everything in the software.
- **Dashboard:** the first screen after login.

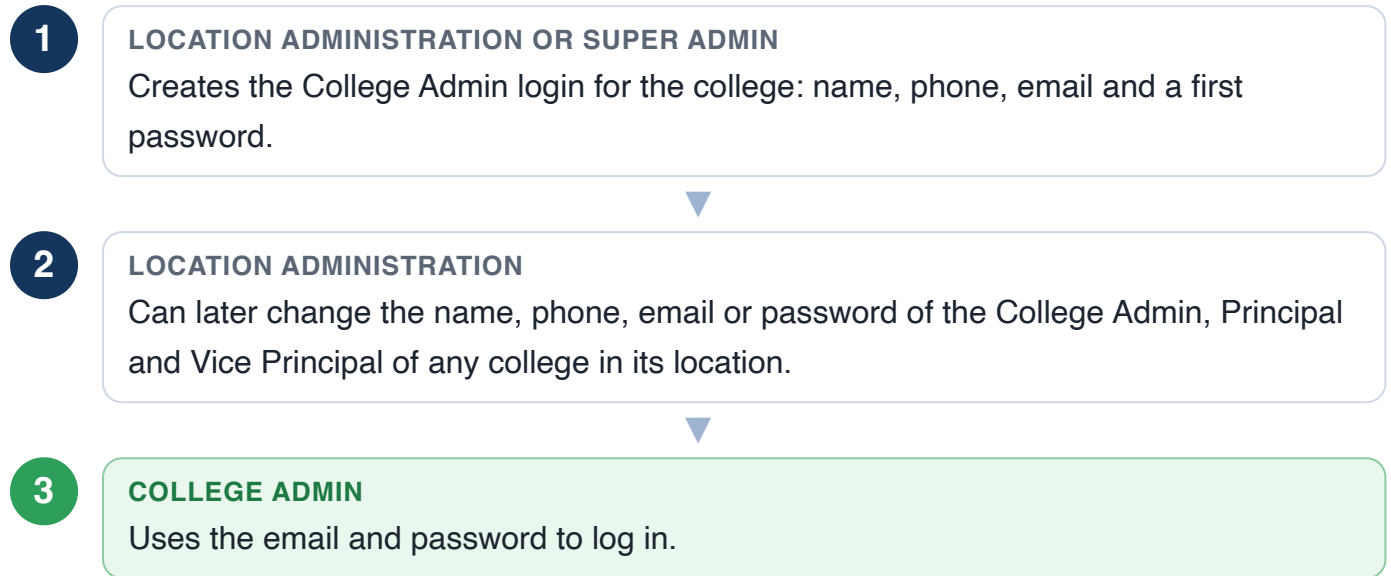

1. The College Admin in one picture

The College Admin **keeps the college running**: adds people, sets up departments, gives job positions, sends notices, and checks reports. But the College Admin **does not make the big yes/no decisions** on hiring or leave. Those belong to the Principal and Vice Principal.

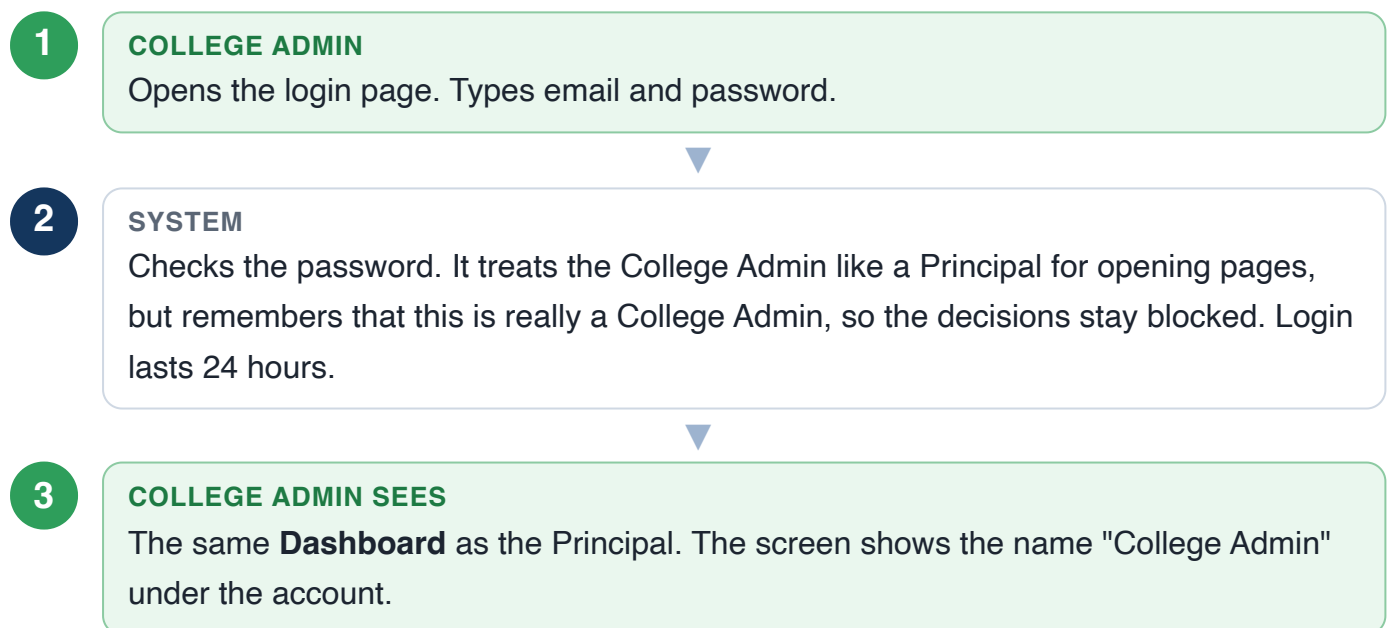

Important idea. The College Admin is a **shared office login**, not one fixed person. Whoever holds it today can change later by handing over the password. So it has **no personal profile, no personal attendance and no personal leave**.

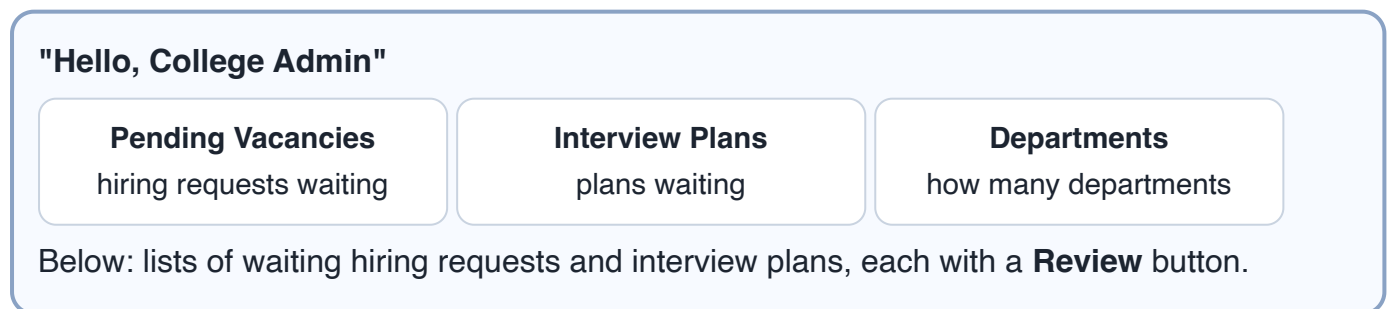

2. How the College Admin account starts

3. Login and the first screen

What the Dashboard shows

Please note. These hiring boxes are made for the Principal. The College Admin can look at them, but **cannot say yes or no**. If the College Admin tries, the system answers: "Only the Principal or Vice Principal can decide."

The Account menu (top right, the gear icon)

- **Settings:** opens the college settings.
- **Account & password:** change the **name** and **phone** of whoever holds the login now, and change the **password**. (This replaces "My Profile", which the College Admin does not have.)

4. The menu the College Admin sees

Menu group	What is inside	Can change?
Dashboard	Home screen	-
Academics	Courses and departments · Students · Class timetables · Internal marks	Courses and departments: yes. Students: promote only. Others: look only
Staff & HR	Teachers · Other staff · Circulars (notices)	Yes
Leave & Attendance	Leave history · Staff attendance · Attendance reports	Look, import attendance
Administration	History of actions · Role Assignments (who holds which job) · Settings	Role Assignments and Settings: yes

Hidden from the College Admin menu (these belong to the Principal and Vice Principal):

- **Leave Approvals** (deciding leave)
- **Hiring Requests** and the later hiring steps
- **My Profile, My Attendance, My Leave** (personal pages)
- The money and purchase pages (not covered in this guide)

Hiding is only for looks. Even if someone opens such a page directly, the system still refuses the decision.

5. The College Admin's main work

5.1 Add or change a teacher or staff member

- 1** **COLLEGE ADMIN**
Opens **Faculty** (teachers) or **Staff**. Picks a department.
- 2** **COLLEGE ADMIN**
Chooses **Add Faculty** (one person) or **Import** (an Excel file with many people). Fills in the details and saves.

3

SYSTEM

Saves the person and writes a record of who added them.

4

COLLEGE ADMIN

Can later open the person to see or change their profile pages, manage their login, or delete the record.

If someone is marked Resigned or Retired, their job positions are removed and their login becomes read-only.

5.2 Give a person a job position (Role Assignments)

1

COLLEGE ADMIN

Opens **Role Assignments**. Sees all positions: Principal, Vice Principal, Academics, HOD of each department, IQAC, T&P, R&D, Placement, Exam Cell, Library, Webmaster.

2

COLLEGE ADMIN

Picks a position and chooses **Assign, Vacate, Update, Remove** or **Reactivate**. Picks the person.

3

SYSTEM

Checks the rules. A college has only one Principal and one Vice Principal. Resigned or retired staff cannot be chosen. A College Admin position cannot be created from this page.

4

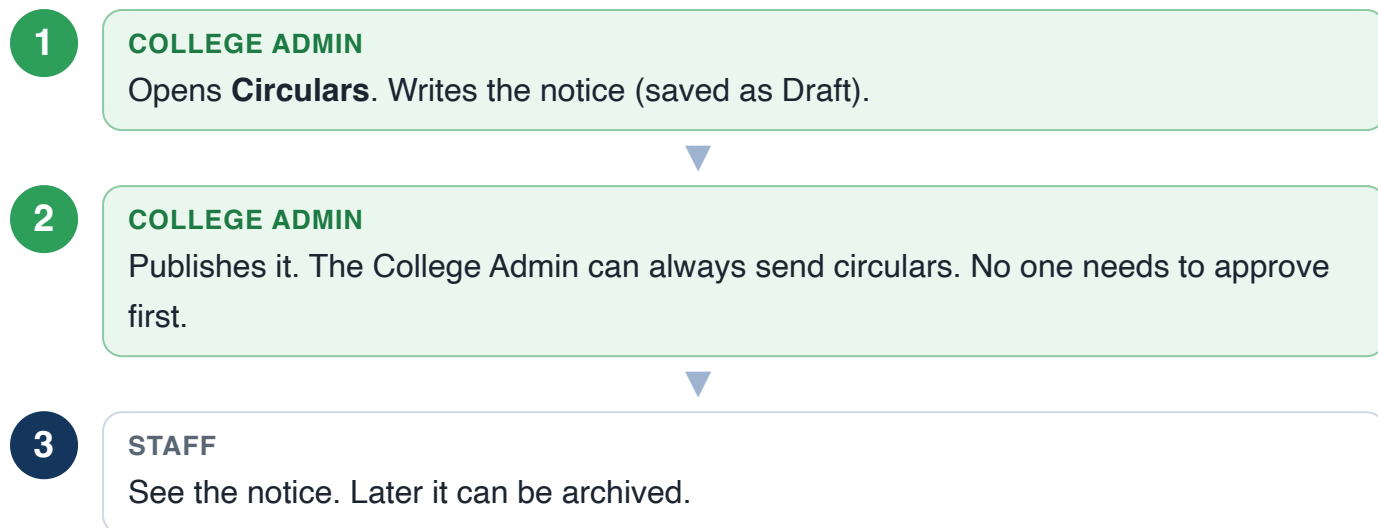

THE CHOSEN PERSON

Gets the new role. Their menu changes the next time they log in.

5.3 Set up departments and courses

- Create or change **departments, courses** and the course list (catalog).
- Set **which years each department teaches**. If none is set, the system treats it as "not set", not "all years".
- The system will **refuse** to remove a year while students, sections or timetables still use it.
- Also set up **academic years, holidays** and **working days**.

5.4 Send a circular (notice)

5.5 Change college settings

Open **Settings**. Cards: College Information · Faculty Norms · Student Permissions · Leave Module · Leave Approval Routing · Vacation Staff · Leave Type Rules. Change and save. It works immediately and no one approves it.

5.6 Move students up a year

Students → **Promotion** tab. Choose the group and confirm. Students move to the next year. Final-year students become "Graduated". The Roster itself has no Add or Delete buttons.

5.7 Look and check

Students	List with search and filters (course, department, year, section). Open a student to see details.
Class timetables	Published timetables. Read only.
Internal marks	Marks entered by teachers. Read only.
Attendance and reports	Who came, who is absent, shortage, faculty who have not recorded student attendance. Attendance can be imported from a file. The "attendance completion" report is blocked for the College Admin.
Leave history	Past leave of each department and person. Read only.
History of actions	The last 100 actions in the college (who did what and when).

6. What the College Admin can and cannot do

Can do

- **Add / change** teachers and staff
- **Set up** departments, courses, academic years, holidays
- **Give** job positions (Role Assignments)
- **Send** circulars
- **Change** college settings
- Move students to the next year
- Import attendance
- **Look at** students, timetables, marks, attendance, leave history, action history
- Change own name, phone and password

Cannot do

- Say yes or no to a **hiring request**
- Approve, reject or change an **interview plan**
- Choose or reject a **candidate** or set salary terms
- Approve or reject **leave**, or check leave proof papers
- See the "attendance completion" report
- Have a personal profile, attendance or leave
- Create sections (HOD), enter marks (teachers), send exam notices (Exam Cell)
- See another college

7. College Admin compared with Principal

Task	Principal	College Admin
Decide hiring request	Yes	No
Decide interview plan	Yes	No
Choose candidate and set salary	Yes	No
Decide staff leave	Yes	No
Add / change teachers and staff	Yes	Yes
Departments and courses	Yes	Yes
Role Assignments	Yes	Yes
Circulars	Yes	Yes
Settings	Yes	Yes
Action history	Yes	Yes

Task	Principal	College Admin
Personal profile, attendance, leave	Yes	No (uses "Account & password" instead)
Attendance completion report	Yes	No

8. Who works with the College Admin

Person	How they connect
Location Administration	Creates the College Admin login and can change its details and password.
Super Admin	Creates colleges and logins. Decides which menu items the College Admin sees.
Principal and Vice Principal	Peers in the same office. The College Admin prepares the data, they make the decisions.
HOD	The College Admin adds the HOD's teachers and sets up their department. Hiring and leave requests from the HOD go to the Principal, not the College Admin.
College Office	Works on papers and records. The College Admin sees the same reports.
Teachers and staff	Added and managed by the College Admin. Their leave is decided by the HOD, then the Principal if needed.
Students	Only viewed and promoted.

9. One full day of the College Admin, in order

1. Log in → see the Dashboard
2. Add or update teachers and staff (Faculty, Staff, Import)
3. Set up departments, courses, holidays and working days if needed
4. Open **Role Assignments** → give or change job positions
5. Write and publish a **circular** if needed
6. Check **students, timetables, marks, attendance reports and leave history**
7. Change **settings** if needed
8. Check the **history of actions** → Log out

Every change is recorded. The system saves who did what and when, so the Principal can check it in the history of actions.

10. Things to know before relying on this role

These are places where the software and the intended rule do not fully match. They are listed in plain words so nobody is surprised.

- **Messages the College Admin cannot act on.** When an HOD sends an interview plan or special leave to the Principal, the College Admin also receives the message, but cannot approve it.
- **Dashboard hiring boxes.** They look usable but only the Principal can decide. The system shows a "not allowed" message.
- **Hiring papers.** The rule says the College Admin never decides hiring, but the system does not stop the College Admin from *creating* an appointment letter, a hiring request or hiring terms. Only the yes/no decisions are blocked.
- **Appointing the Principal.** The College Admin can place a person in the Principal or Vice Principal position through Role Assignments.
- **Mobile bottom bar.** It may still show a "Profile" button, which opens a page meant for the Principal and Vice Principal.
- **Deleting.** The College Admin can delete teachers, staff and departments with only an "are you sure?" question. No one approves it.
- **Testing.** These points were found by reading the software's rules. They were not tried by clicking through a live system.
