

What the Principal Does in the Faculty Management System

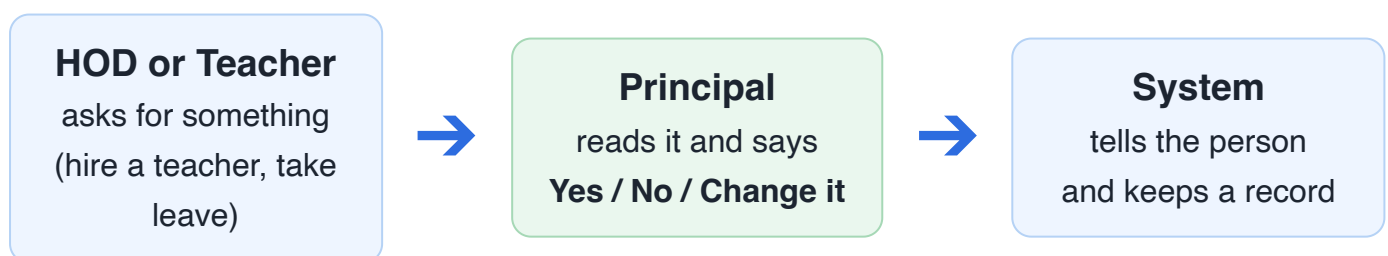

A simple guide. No technical words. Read it from top to bottom, it takes about 10 minutes.

Words used in this guide

- **Principal**: the head of the college. This is the person using the system.
- **Vice Principal**: the Principal's deputy. Can do almost everything the Principal can.
- **HOD**: Head of Department (for example, head of the Computer Science department).
- **College Office**: the office staff who handle papers, records and joining formalities.
- **Management**: the owners or senior authority above the Principal.
- **Dashboard**: the first screen you see after logging in.
- **Approve** = say yes. **Reject** = say no. **Modify** = ask for changes and send back.

1. The Principal's job in one picture

People below the Principal **ask for things**. The Principal **looks at the request** and gives an **answer**. The system then **tells the person** who asked.

The Principal has **three kinds of work**:

1. Decide

Say yes or no to: hiring a new teacher, interview plans, who to appoint, staff leave.

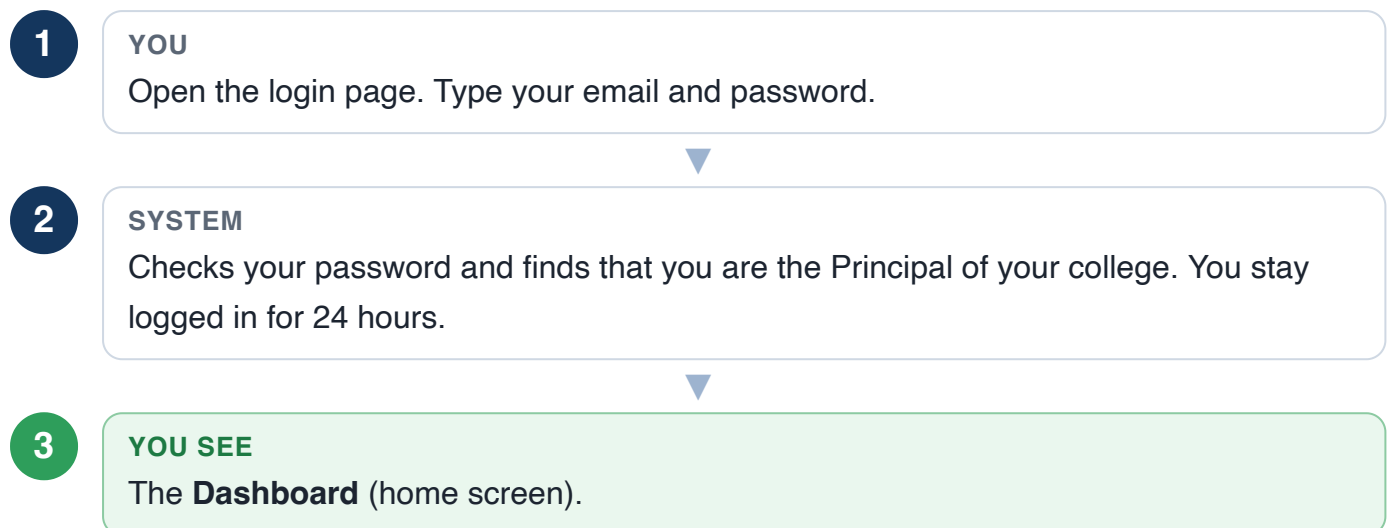

2. Watch

See students, class timetables, marks, staff attendance, and a history of what happened.

3. Arrange

Set college rules, choose who holds which job, add staff, send circulars.

2. Starting: login and the first screen

What the Dashboard shows

"Hello, Principal"

Pending Vacancies
how many hiring requests
are waiting for you

Interview Plans
how many interview plans
are waiting

Departments
how many departments the
college has

Below the boxes: a short list of waiting **hiring requests** and waiting **interview plans**, each with a **Review** button.

Please note: the Dashboard only shows hiring work. Leave requests and other items are reached from the menu on the left.

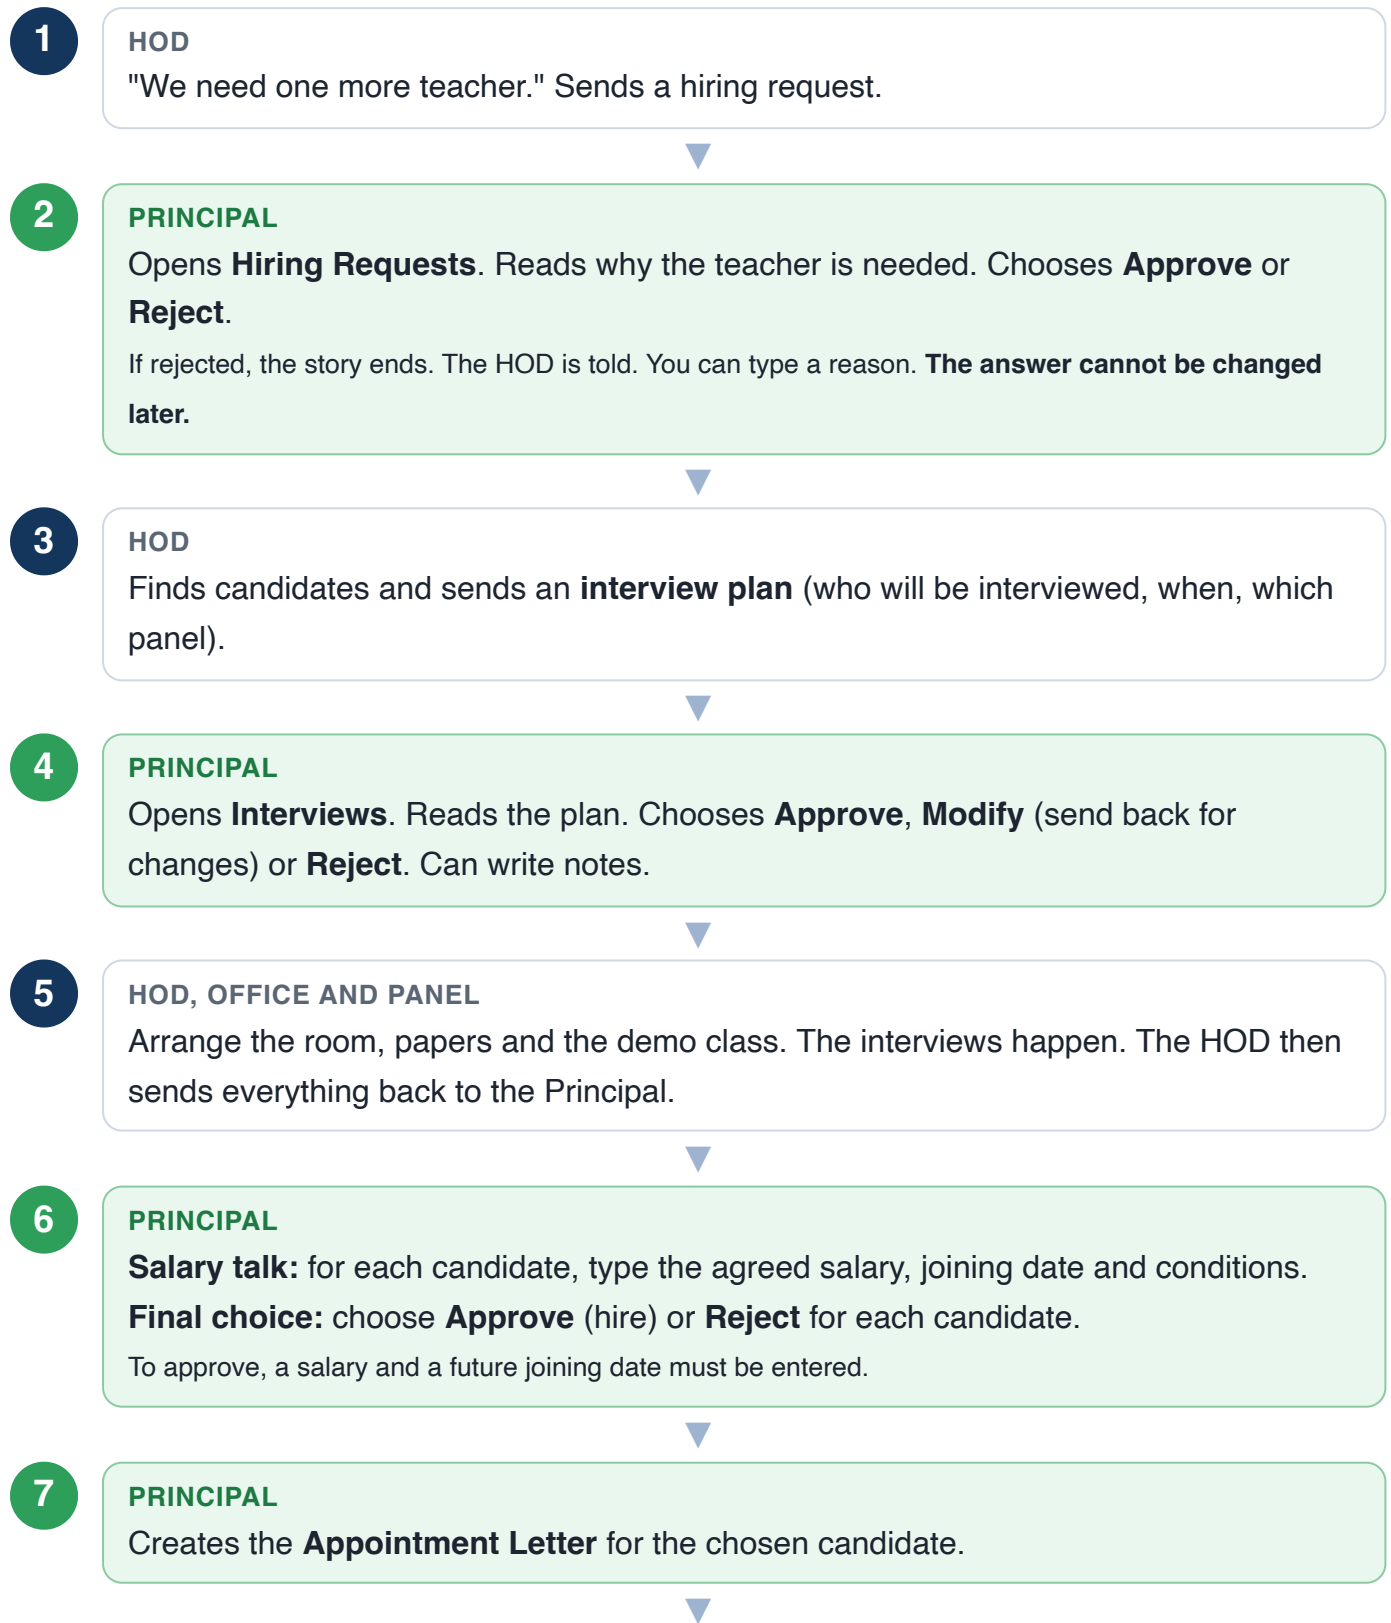

The menu on the left side

Menu group	What is inside (in simple words)
Dashboard	The home screen.
Academics	Courses and departments · Students · Class timetables · Internal exam marks
Staff & HR	Teachers · Other staff · Circulars (notices to staff)
Leave & Attendance	Leave requests waiting for you · Past leave records · Staff attendance · Attendance reports
Hiring	Hiring requests. After you approve one, the later steps (interviews, salary talks, final choice, appointment letter) follow here.

Menu group	What is inside (in simple words)
My own pages	My profile · My attendance · My leave
Administration	History of actions · Who holds which job · College settings

3. Main work 1: Hiring a new teacher

This is the Principal's biggest job. It has many steps, but the Principal only acts at the **green** steps.

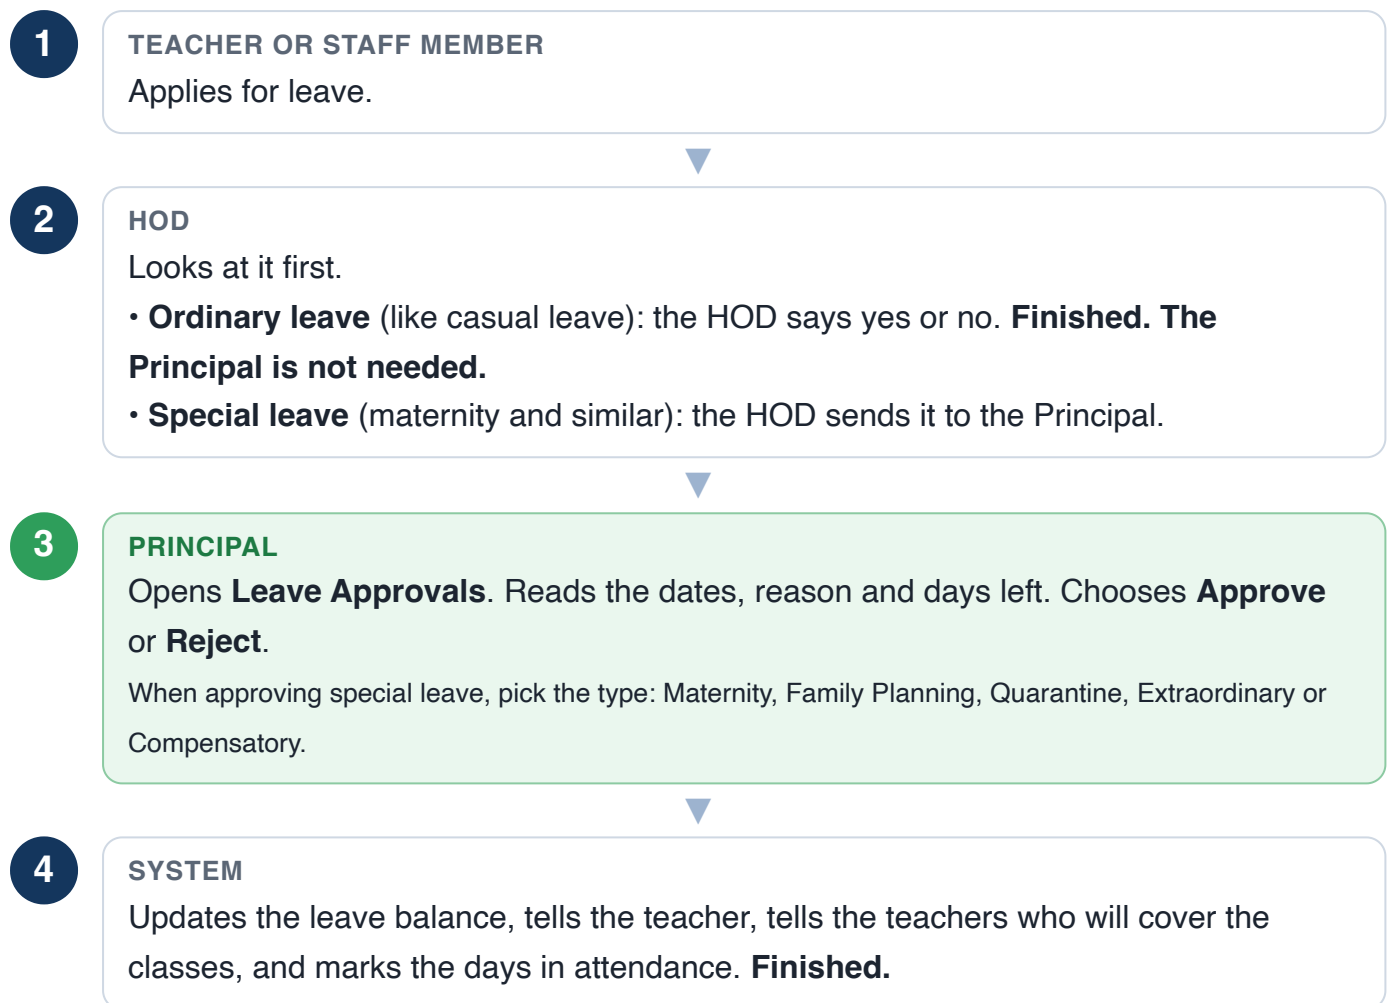

8

CANDIDATE AND COLLEGE OFFICE

The candidate accepts the offer. The Office completes the papers. The new teacher joins. **Finished.**

4. Main work 2: Staff leave

Remember: The Principal's **own** leave is decided by **Management**, not by the Principal.

5. Other work

Task	How it works
Give someone a job position (Role Assignments)	Open the page, choose a position (for example, HOD of a department, Exam Cell, Library). Choose the person. Save. The person's menu changes the next time they log in. Staff who have resigned or retired cannot be chosen.
Add or change teachers and staff	Add one by one, or upload an Excel file. Open a person to see or change their details.
Departments and courses	Create or change departments and courses, and set which years each one teaches.
Circulars (notices)	Write a notice and publish it. No one needs to approve it first. The Principal can also choose who else may send notices.

Task	How it works
Move students up a year (Students → Promotion)	Choose the group and confirm. Students move to the next year. Final-year students become "Graduated".
College settings	Change college details, teaching-load rules and leave rules. Changes take effect immediately.
History of actions (Audit Logs)	See the last 100 actions in the college: who did what and when.

6. Things the Principal can only look at

These pages are for **watching**. The Principal cannot change anything here.

Students	The list of students. Search or filter by course, department, year or section. Open a student to see their details.
Class timetables	Timetables that have already been published.
Internal marks	Marks entered by teachers.
Staff attendance and reports	Who came today, who is absent, who is short of attendance, which teachers have not recorded student attendance.
Leave history	Past leave of each department and each person.

7. What the Principal can and cannot do

Can do

- **Decide** hiring requests, interview plans, who to hire, staff leave
- **Create** appointment letters, circulars, departments, courses, staff
- **Choose** who holds each job position
- **Change** college settings
- **Look at** students, timetables, marks, attendance, history
- Move students up a year

Cannot do

- Create class sections (the HOD does this)
- Enter or change marks (teachers do this)
- Send exam notices (the Exam Cell does this)
- Decide own leave (Management does this)
- See any other college
- Undo or re-open a decision after saying yes or no

What about the Vice Principal? The Vice Principal can do almost the same work. The two small differences: a leave request sent *only* to the Principal can be decided only by the Principal, and the Vice Principal cannot decide their own leave.

What about a "College Admin" login? A College Admin can open the Principal's pages and enter information, but **cannot say yes or no** to hiring or leave. Only the Principal or Vice Principal can.

8. Who works with the Principal

Person	What they send to the Principal	What happens next
HOD	Hiring requests, interview plans, special leave	The Principal answers. The HOD gets a message and carries on.
Teachers	Special leave (through the HOD)	Approved or rejected. The teacher is told.
College Office	Papers, records and joining formalities	The Office completes the joining after the Principal approves.
Vice Principal	Shares the Principal's work	-
Management	Decides the Principal's own leave	-
Students	Nothing	The Principal only looks at student records.

9. One full day of the Principal, in order

1. Log in → see the Dashboard
2. Open waiting **hiring requests** → Approve or Reject
3. Open waiting **interview plans** → Approve, Modify or Reject
4. (Later) **Salary talk** → **Final choice** → **Appointment letter**
5. Open **Leave Approvals** → Approve or Reject
6. **Look** at students, timetables, marks and attendance reports
7. Do other work if needed: staff, circulars, job positions, settings
8. Check the **history of actions** → Log out

Every time the Principal says **yes** or **no**, the system **tells the person who asked** and **saves a record** of who decided and when. Nothing is lost.

10. Things not available yet

So that nobody expects these:

- There is no way to **undo** a yes or no on a hiring request or a candidate.
- Circulars are **not** checked by anyone before they are published.
- The history of actions shows only the **last 100** and cannot be searched.
- The Dashboard has no boxes for leave, attendance or students.
