Class Representative

Class Leader (CR) login — section timetable access

This guide is for the student appointed as **Class Representative** for a section, and for the Head of Department or College Office staff member who creates and maintains that login.

It covers signing in, the Dashboard, the Class Timetable, and the profile and password screens — together with the access limits that apply to the role.

1 About This Manual

1.1 Purpose and audience

The Class Representative (CR) login gives one student per section a read-only view of their own class timetable inside the College Management System.

This manual is written for two readers. The **Class Representative** will find how to sign in and use the two screens available to them. The **Head of Department** or College Office staff member responsible for the section will find how to create, reset and remove the login.

The role is deliberately small. A Class Representative can see their section's schedule and nothing else — they cannot mark attendance, view the student roster, apply for permissions or see marks. Section 2 sets out exactly what the role can and cannot do.

1.2 How to use this guide

Sections 1 to 3 explain the role and the terms used. Section 4 is for the person creating the login. Sections 5 to 8 are the day-to-day instructions for the Class Representative. Sections 9 to 11 provide the end-to-end workflow, the rules that constrain the role, and a troubleshooting table.

Throughout, the exact words shown on screen are set in **bold** — for example, select **Full Timetable**. Web addresses and technical values appear as `code`.

> **NOTE**
> Your college may hide individual menu entries. If a screen described here does not appear in your sidebar, it has been switched off for your college rather than removed from the system.

1.3 Roles covered

Role	Shown in system as	Involvement
Class Representative	Class Leader	Signs in and uses the Dashboard, Class Timetable and profile screens.
Head of Department	Head of Department	Creates the login from the section record, resets its password, removes it.
College Office / Principal	College Admin	May perform the same actions as the Head of Department for any section.

> **IMPORTANT**
> The Class Representative login is separate from a student's own roll-number login. A student who has both signs in with different credentials for each; the two accounts do not share data.

2 Who Can Do What

2.1 Permissions at a glance

The table below lists every task related to the Class Representative login and the role that may perform it.

Task	Class Representative	Head of Department	College Office / Principal
Create the Class Representative login	No	Yes	Yes
Reset the Class Representative password	No	Yes	Yes
Remove the Class Representative login	No	Yes	Yes
View own section's Dashboard	Yes	—	—
View own section's Class Timetable	Yes	—	—
Download, export or print the timetable	Yes	—	—
Change own password / upload own photo	Yes	—	—
View another section's timetable	No	Yes	Yes
Mark or view student attendance	No	Yes	Yes
View the student roster or marks	No	Yes	Yes
Edit the timetable or assign faculty	No	Yes	Yes

2.2 Access restrictions

- A Class Representative login is bound to **exactly one section**, fixed when the login is created.
- The system serves only that section. A request for any other section is ignored — the restriction is enforced on the server, not merely hidden in the menu.
- The role has no access to any other part of the system. Addresses outside `/class-leader` are blocked.
- A section may have **one** Class Representative login at a time. To change holder, remove the existing login and create a new one.

> **WARNING**
> The Class Representative is a shared, rotating position. Treat the password as belonging to the post rather than the person: whenever the holder changes, the Head of Department should reset the password or remove and recreate the login.

3 Key Concepts

3.1 Terms used in this manual

Term	Meaning
Class Representative (CR)	The student appointed to represent a section. In the system the role is labelled **Class Leader**; the two names refer to the same login.
Section	One class group — for example *CSE-A* — belonging to a course, a year of study and an admission batch. The CR login is tied to one of these.
Class Incharge	The faculty member responsible for the section. Shown on the Dashboard as **In-charge:** followed by their name.
Period	One teaching slot in the day, numbered in sequence. Its start and end times come from the college's semester timings.
Substitute	A faculty member covering a period for the regular teacher, usually because of approved leave. Shown as **Sub:** followed by their name.
Lab batch	A subdivision of the section for practical classes. A period may apply to one batch only.
Semester	The teaching term. Timetables are kept per semester, and the CR may look at any semester their course has.

3.2 Prerequisites

Before a Class Representative can sign in and see a timetable, all of the following must already exist.

Prerequisite	Set up by	If missing
The section record	Head of Department	There is nothing to bind the login to.
The student on the section roster	College Office	The student cannot be chosen in **Select Student (CR)**.
Semester timings for the course and year	College Office	The timetable shows **Timings Not Configured**.
A published timetable for the section	Head of Department or Timetable Incharge	The schedule appears empty even though sign-in succeeds.

> **NOTE**
> The Class Representative sees the timetable exactly as published. Any correction — a changed period, a room, a substitute — is made by the Head of Department or Timetable Incharge and appears to the CR the next time the page is loaded.

4 Creating the Class Representative Login

Who performs this: Head of Department, College Office or Principal.

Before you start: confirm the section exists and the student is on its roster, and decide the email address and temporary password to issue.

4.1 Create the login

1. From the sidebar select **Sections**.
2. Open the section the representative belongs to, then select **Edit**.
3. Scroll to the **Class Leader Login** panel.
4. Under **Select Student (CR)**, choose the student from **Enrolled Students**. The list contains only students in this section.
5. Enter an **Email**. This becomes the username the representative signs in with.
6. Enter a **Temporary Password** of at least six characters.
7. Select **Set Login**.

On success the message **Class Leader account created** is shown and the panel changes to display the holder's name with **Reset Password** and **Remove** actions. Issue the email address and temporary password to the student and ask them to change the password at first sign-in (section 8.2).

4.2 Validation messages

Message	Meaning and what to do
Email and password are both required	One of the two boxes is empty. Complete both and select **Set Login** again.
Password must be at least 6 characters	Choose a longer temporary password.
Failed to create Class Leader login	The account could not be created — most often because the email address is already in use by another login. Use a different address.

> **IMPORTANT**
> The email address is the username. It does not have to be a college address, but it must not already belong to another account in the system.

4.3 Reset the password

Use this when a representative has forgotten their password, or when the position passes to another student and you want to keep the same login.

1. Open **Sections** → the section → **Edit**.
2. In the **Class Leader Login** panel select **Reset Password**.
3. In the **Reset Class Leader Password** dialog, type the **New Password** (at least six characters).
4. Confirm the dialog.

On success the message **Password reset** is shown. The previous password stops working immediately. If the reset fails, **Failed to reset password** is shown and the old password remains in force.

4.4 Remove the login

Use this when the section no longer needs a representative, or when you intend to issue the login to a different student under a different email address.

1. Open **Sections** → the section → **Edit**.
2. In the **Class Leader Login** panel select **Remove**.
3. Confirm when prompted.

On success the message **Class Leader login removed** is shown. The account can no longer sign in and the section is left with no representative until a new login is created.

> **WARNING**
> Removal takes effect immediately and cannot be undone from this screen. To restore access you must create a new login using the steps in section 4.1.

> **NOTE**
> Removing the login does not affect the student's own record, their roll-number login, or anything on the section. Only the representative account is withdrawn.

Choosing between reset and remove

Situation	Recommended action
Password forgotten	**Reset Password** — the same holder keeps the account.
New representative, same email acceptable	**Reset Password**, then reissue the credentials.
New representative, own email wanted	**Remove**, then create a new login (4.1).
Section no longer needs a CR	**Remove**.

5 Getting Started as a Class Representative

5.1 Signing in

Who performs this: Class Representative. **Before you start:** you need the email address and password issued by your Head of Department.

1. Open the College Management System in your browser.
2. In **Username**, type the **email address** you were given.
3. In **Password**, type your password. Select the eye icon (**Show password**) to check what you have typed.
4. Select **Sign in**.

The button shows **Signing in…** while it works. On success you arrive at your Dashboard, headed with your section's name.

> **IMPORTANT**
> Sign in with the **email address** issued for the Class Representative post — not with your roll number. The sign-in box is labelled **Email or Roll Number** because it is shared with students and staff, but a roll number will not open the representative account.

5.2 Sign-in messages

Message	What to do
Both fields are required.	Fill in both the username and the password.
Invalid username or password. Please try again.	Check the email address and password. If you are typing your roll number, use the email address instead.
Incorrect password.	The username is recognised but the password is wrong. Ask for a password reset (4.3).
No account found with this username or email.	The login may not have been created yet, or it has been removed. Contact your Head of Department.
This account has been disabled. Contact your administrator.	The account has been deactivated. Contact your Head of Department.
Too many attempts. Please wait a minute and try again.	Wait a minute before trying again. Repeated failures are blocked for safety.
Network error. Please check your connection.	Check your internet connection and retry.

5.3 Navigating the dashboard

After signing in you see the sidebar on the left and the current screen on the right. The Class Representative sidebar has three entries and no others.

Sidebar — Class Representative	
Dashboard	Your section's classes for a chosen day, and the subjects running this semester. This is the screen you land on.
Timetable	The full weekly timetable, with filters, week and semester switching, and download, export and print.
My Profile	Your profile photo, your account details and **Change Password**. Listed under the **Personal** heading.

Figure 1. The three sidebar entries available to a Class Representative. No other part of the system is reachable from this login.

What the top of the Dashboard tells you

The heading confirms which section the login is bound to. Beneath it, a single line lists:

Department	The department the section belongs to.
Batch	The admission batch, for example *2024–2028*.
In-charge	The faculty member responsible for the section, when one is assigned.

If the heading reads **Class Leader Dashboard** rather than your section's name, and the page shows **No Section Linked**, your login has not been bound to a section — see section 11.

> **NOTE**
> Signing out is done from your account menu at the top right of the screen. Your session ends automatically after 24 hours, after which you sign in again.

5.4 What to do on your first sign-in

Work through these four steps once, when you first receive the login.

1. Sign in with the email address and temporary password you were given (section 5.1).
2. Open **My Profile** and select **Change Password**. Replace the temporary password with one only you know (section 8.2).
3. Check the Dashboard heading names your own section, and that the **In-charge** shown is your Class Incharge. If either is wrong, report it before relying on the schedule.
4. Open **Timetable** and confirm the week shown matches the classes you are attending. If the timetable is empty, see section 11.

6 Using the Dashboard

6.1 Class Schedule

The **Class Schedule** panel lists the periods for one day. Today's day is shown first; the line beneath the heading names the day being displayed.

When the timetable runs on more than one day, a row of day buttons appears at the top right of the panel. Select a day to switch to it. Only days that actually have classes are offered.

What each period card shows

Element	Meaning
Period n	The period number within the day.
Lab	Shown when the period is a practical class.
Subject name	The subject taught in that period. A lab batch, when the period applies to one, follows the subject name.
Time	The start and end time, taken from the college's semester timings.
Faculty name	The teacher for that period, or **Not assigned** when none has been set.
Sub: name	A substitute is covering the period. Highlighted so it is easy to spot.
Room	The classroom, when one is recorded for the period.

> **NOTE**
> If a day has no classes, the panel reads **No classes scheduled for** that day. This is normal for a day the section does not attend.

Opening the full week

Select **Full Timetable** at the top right of the Dashboard to open the weekly view described in section 7.

6.2 Semester subjects

Below the schedule, a second panel lists the subjects running in the current semester — headed, for example, **III Sem Subjects**. For each subject it shows the subject code, the subject name, whether it is a lab, and the faculty assigned to it.

This list is drawn from the teaching assignments made by the Head of Department. If it reads **No subjects or faculty are assigned for this semester yet**, the assignments have not been completed — this is a matter for the department, not something the representative can change.

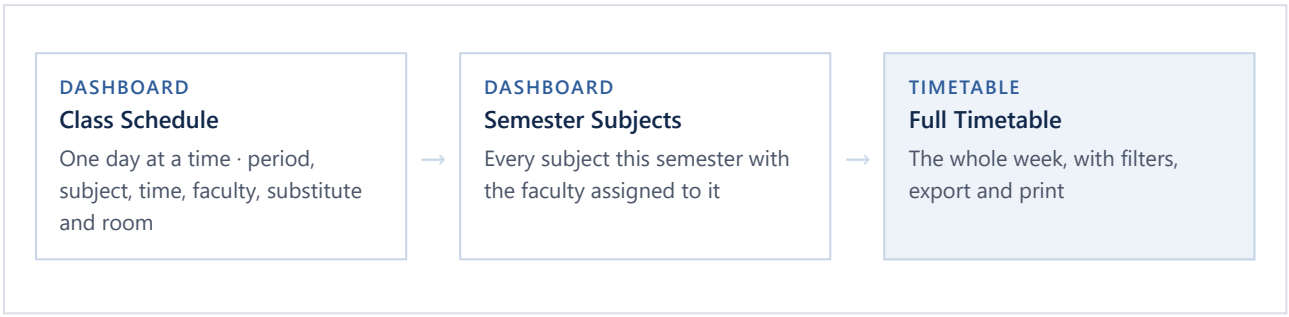

Figure 2. The two Dashboard panels and the route to the weekly timetable.

Keeping the information current

Both panels are built from live records each time the page loads. There is no separate refresh action: reload the page to pick up a change made by the department — a newly assigned faculty member, a substitute arranged for approved leave, or a corrected room.

> **IMPORTANT**
> A substitute shown against a period reflects an approved leave arrangement already recorded in the system. Treat it as the authoritative teacher for that period unless your department tells you otherwise.

7 Using the Class Timetable

7.1 Opening the timetable

Select **Timetable** in the sidebar, or **Full Timetable** on the Dashboard. The page is headed **Class Timetable** and shows your section's weekly schedule.

Two messages may appear instead of a timetable:

- **No Section Linked** — your login is not bound to a section. Contact your College Office or Head of Department.
- **Timings Not Configured** — semester timings have not been set for your course and year, so periods have no times yet. This is set up by the College Office.

7.2 Filters and views

The controls above the timetable let you narrow and change what is displayed.

Control	What it does
Semester: chips	Switches between the semesters your course has. The current semester is selected when the page opens.
Week navigation	Moves to the previous or next week. **Today** returns to the current week.
All / **Theory** / **Practical**	Shows all periods, theory periods only, or practical periods only.
Batch: All	Appears only when the section has lab batches. Choose **All Batches** or a single batch.
Clear filters	Appears once a filter is active; returns the view to all periods and all batches.
Week Matrix / **Day View**	Switches between the full-week grid and a single day at a time.

> **NOTE**
> Filters change only what you see. They do not alter the timetable, and they are not saved — the page opens unfiltered next time.

Breaks appear in the grid as **Lunch Break** and **Short Break**. A period with no class shows as **Free**, and a period awaiting a teacher shows as **Not assigned yet**. During a live class the current period is marked **LIVE**.

7.3 Download, export and print

The timetable can be taken away in three formats — useful for pinning on a notice board or sharing with the class.

Action	Result
Download PDF	Saves the timetable as a PDF laid out for printing. The message **Timetable downloaded** confirms success.
Export Excel	Saves the timetable as a spreadsheet. The message **Timetable exported** confirms success.
Print	Opens your browser's print dialog with the timetable formatted for paper.

If an export does not work

Message	What to do
Download failed	Try again. If it persists, use **Print** and save as PDF from the print dialog.
Export failed	Try again, or use **Download PDF** instead.
Popup blocked	Your browser blocked the print window. Allow pop-ups for this site and select **Print** again.

> **IMPORTANT**
> A downloaded or printed timetable is a snapshot. If the department later changes a period or arranges a substitute, your copy will be out of date — take a fresh one after any announced change.

What the exported copy contains

The exported timetable carries the college name, your course, year, section and semester, and the period grid as displayed — including breaks and room numbers. Any filter you have applied is reflected in the export, so clear filters first if you want the complete week.

8 Managing Your Profile

Select **My Profile** in the sidebar. The page is headed **My Profile**, described as *Manage your profile photo and account details*.

8.1 Profile photo

Your photo appears beside your name across the system. Use the photo control at the top of the page to upload a new picture or replace the existing one.

Beneath it, your account details are listed for reference — your name, the section your login is bound to, and your role. These are set by your Head of Department and cannot be edited here.

8.2 Changing your password

When to do this: immediately after your first sign-in with the temporary password, and whenever you believe the password may be known to others.

1. Select **Change Password** at the top right of the profile page.
2. In the **Set a new password** dialog, type your current password.
3. Type the new password. It must be at least **8 characters** — the box notes **Min 8 characters**.
4. Select **Change Password** to confirm, or **Cancel** to abandon.

On success the message **Password changed** is shown. Use the new password from then on.

Message	What to do
Current password is incorrect.	Re-enter your existing password.
New password is too weak — use at least 8 characters.	Choose a longer password.
Please log out and log back in, then try again.	Your session is too old to change a password. Sign out, sign in and retry.
Too many attempts. Please try again later.	Wait a few minutes before trying again.

> **WARNING**
> Do not share the Class Representative password with classmates. If the position changes hands, ask your Head of Department to reset it rather than passing the password on.

9 Complete Workflow

The diagram below shows the full life of a Class Representative login, from the records that must exist beforehand through to withdrawal of access. The role responsible is named at each stage.

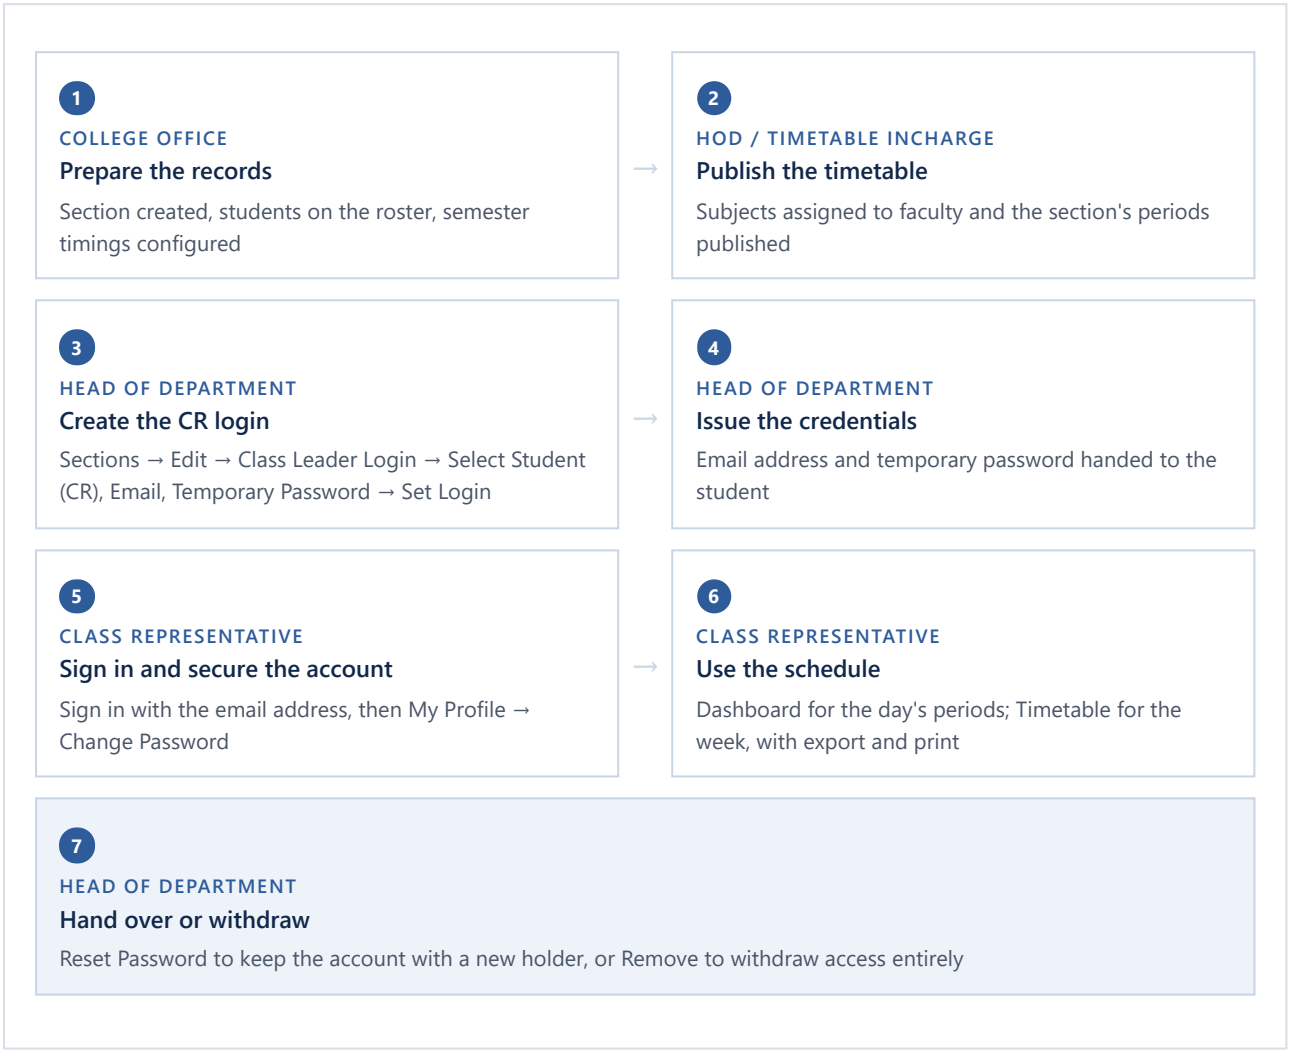

Figure 3. End-to-end workflow for the Class Representative login. Stages 1 and 2 are prerequisites; without them the login works but shows an empty schedule.

> **NOTE**
>
> Stages 1 and 2 are not part of creating the login and may already be complete. The login can be created before the timetable is published — the representative will simply see nothing until it is.

10 Important Rules and Limitations

10.1 Scope of access

- The login is bound to **one section**, chosen when it is created. The binding cannot be changed from the representative's own screens.
- The system ignores any attempt to request a different section and always returns the bound one. This is enforced on the server.
- Addresses outside `/class-leader` are blocked for this role.

10.2 What the role cannot do

- Mark, edit or view student attendance.
- View the student roster, personal student details, marks or internal exam results.
- Raise or approve student permission requests.
- Edit the timetable, assign faculty, or arrange a substitute.
- See another section, another year or another department.
- Create, reset or remove any login, including its own.

10.3 Data dependencies

If this is missing	The representative sees
Section binding on the login	**No Section Linked** on both screens
Semester timings for the course and year	**Timings Not Configured**
Published timetable periods	An empty schedule, with no error
Teaching assignments for the semester	**No subjects or faculty are assigned for this semester yet**
Faculty on an individual period	**Not assigned** against that period

10.4 Account rules

- One Class Representative login per section at a time.
- The email address is the username and must be unique across the whole system.
- A temporary password set by the Head of Department must be at least 6 characters; a password the representative sets for themselves must be at least 8.
- A session lasts 24 hours, after which signing in again is required.

> **WARNING**
> Removing the login takes effect at once and cannot be undone. Restoring access means creating a new login from the section record.

11 Quick Help and Troubleshooting

Problem	Likely cause	What to do
Cannot sign in; roll number is rejected	The representative account uses the email address issued by the department, not a roll number	Sign in with the email address. If you do not have it, ask your Head of Department.
No account found with this username or email.	The login has not been created, or it has been removed	Ask your Head of Department to create the login (4.1).
Password forgotten	No self-service password reset exists for this role	Ask your Head of Department to use **Reset Password** (4.3).
No Section Linked	The login is not bound to a section	Ask your College Office or Head of Department to bind the section from the section record.
Timings Not Configured	Semester timings have not been set for the course and year	This is set up by the College Office. Report it to your Head of Department.
Timetable is empty but sign-in worked	No timetable has been published for the section yet	Ask your Head of Department when the timetable will be published.
Subjects panel is empty	Teaching assignments for the semester are incomplete	Report it to your Head of Department; the representative cannot change this.
A period shows **Not assigned**	No faculty member has been assigned to that period	Report it to your Class Incharge or Head of Department.
The timetable differs from what was announced in class	The published timetable has not been updated, or you are looking at a different week or semester	Check the week and semester selected, then report the difference to your Class Incharge.
Some periods are missing	A filter is active	Select **Clear filters**, and set the batch to **All Batches**.
Popup blocked when printing	The browser blocked the print window	Allow pop-ups for this site, then select **Print** again.
Too many attempts. Please wait a minute and try again.	Several failed sign-in attempts in a short time	Wait a minute, then try again with the correct password.
Sidebar shows fewer entries than this manual describes	Your college has hidden an entry	Ask your Head of Department whether the entry is switched off for your college.

Sri Vishnu Educational Society — College Management System · Class Representative User Manual · Version 1.0, October 2026.
Prepared from the deployed application; screen wording may differ slightly after a system update.
